(c) Large in-lieu contributions

(1) For public facilities

If a public facility or private nonprofit facility located in a special flood hazard area identified for more than 1 year by the Administrator pursuant to the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.) is damaged or destroyed, after the 180th day following November 23, 1988, by flooding in a major disaster and such facility is not covered on the date of such flooding by flood insurance, the Federal assistance which would otherwise be available under this section with respect to repair, restoration, reconstruction, and replacement of such facility and associated expenses shall be reduced in accordance with paragraph (2).

(2) Amount of reduction

The amount of a reduction in Federal assistance under this section with respect to a facility shall be the lesser of—

(A) the value of such facility on the date of the flood damage or destruction, or

(B) the maximum amount of insurance proceeds which would have been payable with respect to such facility if such facility had been covered by flood insurance under the National Flood Insurance Act of 1968 on such date.

(3) Exception

Paragraphs (1) and (2) shall not apply to a private nonprofit facility which is not covered by flood insurance solely because of the local government's failure to participate in the flood insurance program established by the National Flood Insurance Act.

(4) Dissemination of information

The President shall disseminate information regarding the reduction in Federal assistance provided for by this subsection to State and local governments and the owners and operators of private nonprofit facilities who may be affected by such a reduction.

In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is greater than the ceiling percentage established under paragraph (3) of the cost estimated under paragraph (1), the President may determine that the eligible cost includes a portion of the actual cost of the repair, restoration, reconstruction, or replacement that exceeds the cost estimated under paragraph (1).

(B) Actual cost less than estimated cost

(i) Greater than or equal to floor percentage of estimated cost

In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is less than 100 percent of the cost estimated under paragraph (1), but is greater than or equal to the floor percentage established under paragraph (3) of the cost estimated under paragraph (1), the State or local government or person receiving funds under this section shall use the excess funds to carry out cost-effective activities that reduce the risk of future damage, hardship, or suffering from a major disaster.

(ii) Less than floor percentage of estimated cost

In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is less than the floor percentage established under paragraph (3) of the cost estimated under paragraph (1), the State or local government or person receiving assistance under this section shall reimburse the President in the amount of the difference.

(D) Review by President

Not later than 2 years after the date of promulgation of regulations under subparagraph (C) and periodically thereafter, the President shall review the cost estimation procedures and the ceiling and floor percentages established under this paragraph.

(4) Special rule

In any case in which the facility being repaired, restored, reconstructed, or replaced under this section was under construction on the date of the major disaster, the cost of repairing, restoring, reconstructing, or replacing the facility shall include, for the purposes of this section, only those costs that, under the contract for the construction, are the owner's responsibility and not the contractor's responsibility.

ASSISTANCE PROGRAMS**

§ 5191. Procedure for declaration**(a) Request and declaration**

All requests for a declaration by the President that an emergency exists shall be made by the Governor of the affected State. Such a request shall be based on a finding that the situation is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. In determining whether or not such an emergency exists, the President shall consult the Governor of any affected State, if practicable. The President's determination may be made without regard to subsection (a) of this section.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 1 of 1958, prepared in accordance with the Reorganization Act of 1949, as amended. The reorganization plan provides new arrangements for the conduct of Federal defense mobilization and civil defense functions.

In formulating Reorganization Plan No. 1, I have had the benefit of several studies made by the executive branch as well as those conducted by the Congress. The reorganization plan will overcome the major difficulties revealed by those studies and mentioned in my 1959 budget message where I made the following statement:

The structure of Federal organization for the planning, coordination, and conduct of our nonmilitary defense programs has been reviewed, and I have concluded that the existing statutes assigning responsibilities for the central coordination and direction of these programs are out of date. The rapid technical advances of military science have led to a serious overlap among agencies carrying on these leadership and planning functions. Because the situation will continue to change and because these functions transcend the responsibility of any single department or agency, I have concluded that they should be vested in no one short of the President. I will make recommendations to the Congress on this subject.

The principal effects of the organization plan are—

First, it transfers to the President the functions vested by law in the Federal Civil Defense Administration and those so vested in the Office of Defense Mobilization. The result is to establish a single pattern with respect to the vesting of defense mobilization and civil defense functions. At the present time disparity exists in that civil defense functions are vested in the President only to a limited degree while a major part of the functions administered by the Office of Defense Mobilization are vested by law in the President and delegated by him to that Office. Under the plan, the broad program responsibilities for coordinating and conducting the interrelated defense mobilization and civil defense functions will be vested in the President for appropriate delegation as the rapidly changing character of the nonmilitary preparedness program warrants.

Second, the reorganization plan consolidates the Office of Defense Mobilization and the Federal Civil Defense Administration to form a new Office of Defense and Civilian Mobilization in the Executive Office of the President. I have concluded that, in many instances, the interests and activities of the Office of Defense Mobilization and the Federal Civil Defense Administration overlap to such a degree that it is not possible to work out a satisfactory division of those activities and interests between the two agencies. I have also concluded that a single civilian mobilization agency of appropriate stature and authority is needed and that such an agency will ensue from the consolidation and from the

granting of suitable authority to that agency for directing and coordinating the preparedness activities of the Federal departments and agencies and for providing unified guidance and assistance to the State and local governments.

Third, the reorganization plan transfers the membership of the Director of the Office of Defense Mobilization on the National Security Council to the Director of the Office of Defense and Civilian Mobilization and also transfers the Civil Defense Advisory Council to the Office of Defense and Civilian Mobilization.

Initially, the Office of Defense and Civilian Mobilization will perform the civil defense and defense mobilization functions now performed by the Office of Defense Mobilization and the Federal Civil Defense Administration. One of its first tasks will be to advise me with respect to the actions to be taken to clarify and expand the roles of the Federal departments and agencies in carrying out nonmilitary defense preparedness functions. After such actions are taken, the direction and coordination of the civil defense and defense mobilization activities assigned to the departments and agencies will comprise a principal remaining responsibility of the Office of Defense and Civilian Mobilization.

After investigation, I have found and hereby declare that each reorganization included in Reorganization Plan No. 1 of 1958 is necessary to accomplish one or more of the purposes set forth in section 2(a) of the Reorganization Act of 1949, as amended.

I have also found and hereby declare that it is necessary to include in the accompanying reorganization plan, by reason of reorganizations made thereby, provisions for the appointment and compensation of new officers specified in sections 2 and 3 of the plan. The rates of compensation fixed for these officers are, respectively those which I have found to prevail in respect of comparable officers in the executive branch of the Government.

The taking effect of the reorganizations included in Reorganization Plan No. 1 of 1958 will immediately reduce the number of Federal agencies by one and, by providing sounder organizational arrangements for the administration of the affected functions, should promote the increased economy and effectiveness of the Federal expenditures concerned. It is, however, impracticable to itemize at this time the reduction of expenditures which it is probable will be brought about by such taking effect.

I urge that the Congress allow the reorganization plan to become effective.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, April 24, 1958.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

On January 5 I announced a three-part program to streamline the executive branch of the Federal Government. By concentrating less responsibility in the President's immediate staff and more in the hands of the departments and agencies, this program should significantly improve the services of the Government. I believe these reforms have become so urgently necessary that I intend, with the cooperation of the Congress, to pursue them with all of the resources of my office during the coming year.

The first part of this program is a renewed drive to achieve passage of my legislative proposals to overhaul the Cabinet departments. Secondly, I have appointed three Cabinet Secretaries as Counsellors to the President with coordinating responsibilities in the broad areas of human resources, natural resources, and community development, and five Assistants to the President with special responsibilities in the areas of domestic affairs, economic affairs, foreign affairs, executive management, and operations of the White House.

The third part of this program is a sharp reduction in the overall size of the Executive Office of the President and a reorientation of that office back to its original mission as a staff for top-level policy formation and monitoring of policy execution in broad functional areas. The Executive Office of the President should no longer be encumbered with the task of managing or ad-

ministering programs which can be run more effectively by the departments and agencies. I have therefore concluded that a number of specialized operational and program functions should be shifted out of the Executive Office into the line departments and agencies of the Government. Reorganization Plan No. 1 of 1973, transmitted herewith, would effect such changes with respect to emergency preparedness functions and scientific and technological affairs.

STREAMLINING THE FEDERAL SCIENCE ESTABLISHMENT

When the National Science Foundation was established by an act of the Congress in 1950, its statutory responsibilities included evaluation of the Government's scientific research programs and development of basic science policy. In the late 1950's, however, with the effectiveness of the U.S. science effort under serious scrutiny as a result of sputnik, the post of Science Advisor to the President was established. The White House became increasingly involved in the evaluation and coordination of research and development programs and in science policy matters, and that involvement was institutionalized in 1962 when a reorganization plan established the Office of Science and Technology within the Executive Office of the President, through transfer of authorities formerly vested in the National Science Foundation.

With advice and assistance from OST during the past decade, the scientific and technological capability of the Government has been markedly strengthened. This administration is firmly committed to a sustained, broadbased national effort in science and technology, as I made plain last year in the first special message on the subject ever sent by a President to the Congress. The research and development capability of the various executive departments and agencies, civilian as well as defense, has been upgraded. The National Science Foundation has broadened from its earlier concentration on basic research support to take on a significant role in applied research as well. It has matured in its ability to play a coordinating and evaluative role within the Government and between the public and private sectors.

I have therefore concluded that it is timely and appropriate to transfer to the Director of the National Science Foundation all functions presently vested in the Office of Science and Technology, and to abolish that office. Reorganization Plan No. 1 would effect these changes.

The multi-disciplinary staff resources of the Foundation will provide analytic capabilities for performance of the transferred functions. In addition, the Director of the Foundation will be able to draw on expertise from all of the Federal agencies, as well as from outside the Government, for assistance in carrying out his new responsibilities.

It is also my intention, after the transfer of responsibilities is effected, to ask Dr. H. Guyford Stever, the current Director of the Foundation, to take on the additional post of Science Adviser. In this capacity, he would advise and assist the White House, Office of Management and Budget, Domestic Council, and other entities within the Executive Office of the President on matters where scientific and technological expertise is called for, and would act as the President's representative in selected cooperative programs in international scientific affairs, including chairing such joint bodies as the U.S.—U.S.S.R. Joint Commission on Scientific and Technical Cooperation.

In the case of national security, the Department of Defense has strong capabilities for assessing weapons needs and for undertaking new weapons development, and the President will continue to draw primarily on this source for advice regarding military technology. The President in special situations also may seek independent studies or assessments concerning military technology from within or outside the Federal establishment, using the machinery of the National Security Council for this purpose, as well as the Science Adviser when appropriate.

In one special area of technology—space and aeronautics—a coordinating council has existed within the Executive Office of the President since 1958. This body, the National Aeronautics and Space Council, met a major need during the evolution of our nation's space program. Vice President Agnew has served with distinction as its chairman for the past four years. At my request, beginning in 1969, the Vice President also chaired a special Space Task Group charged with developing strategy alternatives for a balanced U.S. space program in the coming years.

As a result of this work, basic policy issues in the United States space effort have been resolved, and the necessary interagency relationships have been established. I have therefore concluded, with the Vice President's concurrence, that the Council can be discontinued. Needed policy coordination can now be achieved through the resources of the executive departments and agencies, such as the National Aeronautics and Space Administration, augmented by some of the former Council staff. Accordingly, my reorganization plan proposes the abolition of the National Aeronautics and Space Council.

A NEW APPROACH TO EMERGENCY PREPAREDNESS

The organization within the Executive Office of the President which has been known in recent years as the Office of Emergency Preparedness dates back, through its numerous predecessor agencies, more than 20 years. It has performed valuable functions in developing plans for emergency preparedness, in administering Federal disaster relief, and in overseeing and assisting the agencies in this area.

OEP's work as a coordinating and supervisory authority in this field has in fact been so effective—particularly under the leadership of General George A. Lincoln, its director for the past four years, who retired earlier this month after an exceptional military and public service career—that the line departments and agencies which in the past have shared in the performance of the various preparedness functions now possess the capability to assume full responsibility for those functions. In the interest of efficiency and economy, we can now further streamline the Executive Office of the President by formally relocating those responsibilities and closing the Office of Emergency Preparedness.

I propose to accomplish this reform in two steps. First, Reorganization Plan No. 1 would transfer to the President all functions previously vested by law in the Office or its Director, except the Director's role as a member of the National Security Council, which would be abolished; and it would abolish the Office of Emergency Preparedness.

The functions to be transferred to the President from OEP are largely incidental to emergency authorities already vested in him. They include functions under the Disaster Relief Act of 1970 [42 U.S.C. 4401 et seq.]; the function of determining whether a major disaster has occurred within the meaning of (1) Section 7 of the Act of September 30, 1950, as amended, 20 U.S.C. 241-1, or (2) Section 762(a) of the Higher Education Act of 1965, as added by Section 161(a) of the Education Amendments of 1972, Public Law 92-318, 86 Stat. 288 at 299 (relating to the furnishing by the Commissioner of Education of disaster relief assistance for educational purposes) [20 U.S.C. 1132d-1]; and functions under Section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), with respect to the conduct of investigations to determine the effects on national security of the importation of certain articles.

The Civil Defense Advisory Council within OEP would also be abolished by this plan, as changes in domestic and international conditions since its establishment in 1950 have now obviated the need for a standing council of this type. Should advice of the kind the Council has provided be required again in the future, State and local officials and experts in the field can be consulted on an ad hoc basis.

Second, as soon as the plan became effective, I would delegate OEP's former functions as follows:

All OEP responsibilities having to do with preparedness for and relief of civil emergencies and disasters would be transferred to the Department of Housing and Urban Development. This would provide greater field capabilities for coordination of Federal disaster assistance with that provided by States and local communities, and would be in keeping with the objective of creating a broad, new Department of Community Development.

OEP's responsibilities for measures to ensure the continuity of civil government operations in the event of major military attack would be reassigned to the General Services Administration, as would responsibility for resource mobilization including the management of national security stockpiles, with policy guidance in both cases to be provided by the National Security Council, and with economic considerations relating to changes in stockpile levels to be coordinated by the Council on Economic Policy.

Investigations of imports which might threaten the national security—assigned to OEP by Section 232 of the Trade Expansion Act of 1962 [19 U.S.C. 1862]—would be reassigned to the Treasury Department, whose other trade studies give it a readymade capability in this field; the National Security Council would maintain its supervisory role over strategic imports.

Those disaster relief authorities which have been reserved to the President in the past, such as the authority to declare major disasters, will continue to be exercised by him under these new arrangements. In emergency situations calling for rapid interagency coordination, the Federal response will be coordinated by the Executive Office of the President under the general supervision of the Assistant to the President in charge of executive management.

The Oil Policy Committee will continue to function as in the past, unaffected by this reorganization, except that I will designate the Deputy Secretary of the Treasury as chairman in place of the Director of OEP. The committee will operate under the general supervision of the Assistant to the President in charge of economic affairs.

DECLARATIONS

After investigation, I have found that each action included in the accompanying plan is necessary to accomplish one or more of the purposes set forth in Section 901(a) of title 5 of the United States Code. In particular, the plan is responsive to the intention of the Congress as expressed in Section 901(a)(1), "to promote better execution of the laws, more effective management of the executive branch and of its agencies and functions, and expeditious administration of the public business;" and in Section 901(a)(3), "to increase the efficiency of the operations of the Government to the fullest extent practicable;" and in Section 901(a)(5), "to reduce the number of agencies by consolidating those having similar functions under a single head, and to abolish such agencies or functions as may not be necessary for the efficient conduct of the Government."

While it is not practicable to specify all of the expenditure reductions and other economies which will result from the actions proposed, personnel and budget savings from abolition of the National Aeronautics and Space Council and the Office of Science and Technology alone will exceed \$2 million annually, and additional savings should result from a reduction of Executive Pay Schedule positions now associated with other transferred and delegated functions.

The plan has as its one logically consistent subject matter the streamlining of the Executive Office of the President and the disposition of major responsibilities currently conducted in the Executive Office of the President, which can better be performed elsewhere or abolished.

The functions which would be abolished by this plan, and the statutory authorities for each, are:

(1) the functions of the Director of the Office of Emergency Preparedness with respect to being a member of the National Security Council (Sec. 101, National Security Act of 1947, as amended, 50 U.S.C. 402; and Sec. 4, Reorganization Plan No. 1 of 1958);

(2) the functions of the Civil Defense Advisory Council (Sec. 102(a) Federal Civil Defense Act of 1950; 50 U.S.C. App. 2272(a)); and

(3) the functions of the National Aeronautics and Space Council (Sec. 201, National Aeronautics and Space Act of 1958; 42 U.S.C. 2471).

The proposed reorganization is a necessary part of the restructuring of the Executive Office of the President. It would provide through the Director of the National Science Foundation a strong focus for Federal efforts to encourage the development and application of science and technology to meet national needs. It would mean better preparedness for and swifter response to civil emergencies, and more reliable precautions against threats to the national security. The leaner and less diffuse Presidential staff structure which would result would enhance the President's ability to do his job and would advance the interests of the Congress as well.

I am confident that this reorganization plan would significantly increase the overall efficiency and effectiveness of the Federal Government. I urge the Congress to allow it to become effective.

RICHARD NIXON.

(f) Plans and procedures will be designed and developed to provide maximum flexibility to the President for his implementation of emergency actions.

SEC. 105. *Interagency Coordination.*

By the authority vested in me as President by the Constitution and laws of the United States of America, including the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251 et seq.), the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 et seq.), the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 et seq.), Reorganization Plan No. 1 of 1958 [set out above], Reorganization Plan No. 1 of 1973 [set out above], and Section 301 of Title 3 of the United States Code, and in order to ensure that plans and procedures are in place to respond to radiological emergencies at commercial nuclear power plants in operation or under construction, it is hereby ordered as follows:

SECTION 1. *Scope.* (a) This Order applies whenever State or local governments, either individually or together, decline or fail to prepare commercial nuclear power plant radiological emergency preparedness plans that are sufficient to satisfy Nuclear Regulatory Commission (“NRC”) licensing requirements or to participate adequately in the preparation, demonstration, testing, exercise, or use of such plans.

(b) In order to request the assistance of the Department of Homeland Security (“DHS”) provided for in

this Order, an affected nuclear power plant applicant or licensee (“licensee”) shall certify in writing to DHS that the situation described in Subsection (a) exists.

(2) that DHS shall use its existing resources to coordinate and manage, rather than duplicate, other available resources;

(3) that implementation of this Order is accomplished with an economy of resources; and

(4) that full reimbursement to the Federal Government is provided, to the extent permitted by law.

SEC. 3. *DHS Participation in Emergency Preparedness Planning.* (a) DHS assistance in emergency preparedness planning shall include advice, technical assistance, and arrangements for facilities and resources as needed to satisfy the emergency planning requirements under the Atomic Energy Act of 1954, as amended [42 U.S.C. 2011 et seq.], and any other Federal legislation or regulations pertaining to issuance or retention of a construction permit or an operating license for a nuclear power plant.

SEC. 4. *Evaluation of Plans.* (a) DHS shall consider and evaluate all plans developed under the authority of this Order as though drafted and submitted by a State or local government.

(b) DHS shall take all actions necessary to carry out the evaluation referred to in the preceding Subsection and to permit the NRC to conduct its evaluation of radiological emergency preparedness plans including, but not limited to, planning, participating in, and evaluating exercises, drills, and tests, on a timely basis, as necessary to satisfy NRC requirements for demonstrations of off-site radiological emergency preparedness.

SEC. 5. *Response to a Radiological Emergency.* (a) In the event of an actual radiological emergency or disaster, DHS shall take all steps necessary to ensure the implementation of the plans developed under this Order and shall coordinate the actions of other Federal agencies to achieve the maximum effectiveness of Federal efforts in responding to the emergency.

(b) DHS shall coordinate Federal response activities to ensure that adequate resources are directed, when an initial response is needed, to activities hindered by the absence or inadequacy of advance State and local commitments. DHS shall also coordinate with State and local governmental authorities and turn over response functions as appropriate when State and local governments do exercise their authority.

(c) DHS shall assume any necessary command-and-control function, or delegate such function to another Federal agency, in the event that no competent State and local authority is available to perform such function.

(c) Immediately upon the effective date of this Order, DHS shall review, and initiate necessary renegotiations of, all interagency agreements to which DHS is a party, so as to conform them to the terms and policies of this Order. This directive shall include, but not be limited to, the Federal Radiological Emergency Response Plan (50 Fed. Reg. 46542 (November 8, 1985)).

(d) To the extent permitted by law, DHS is directed to obtain full reimbursement, either jointly or sever-

Certain national infrastructures are so vital that their incapacity or destruction would have a debilitating impact on the defense or economic security of the United States. These critical infrastructures include telecommunications, electrical power systems, gas and oil storage and transportation, banking and finance, transportation, water supply systems, emergency services (including medical, police, fire, and rescue), and continuity of government. Threats to these critical infrastructures fall into two categories: physical threats to tangible property ("physical threats"), and threats of electronic, radio-frequency, or computer-based attacks on the information or communications components that control critical infrastructures ("cyber threats"). - (xiii) Assistant to the President and Director of the Office of Science and Technology Policy.

SEC. 3. *The Steering Committee of the President's Commission on Critical Infrastructure Protection.* A Steering

Committee ("Steering Committee") shall oversee the work of the Commission on behalf of the Principals Committee. The Steering Committee shall comprise [sic] five members. Four of the members shall be appointed by the President, and the fifth member shall be the Chair of the Commission. Two of the members of the Committee shall be employees of the Executive Office of the President. The Steering Committee will receive regular reports on the progress of the Commission's work and approve the submission of reports to the Principals Committee.

SEC. 4. *Mission.* The Commission shall: (a) within 30 days of this order, produce a statement of its mission objectives, which will elaborate the general objectives set forth in this order, and a detailed schedule for addressing each mission objective, for approval by the Steering Committee;

(d) determine what legal and policy issues are raised by efforts to protect critical infrastructures and assess how these issues should be addressed;

(e) recommend a comprehensive national policy and implementation strategy for protecting critical infrastructures from physical and cyber threats and assuring their continued operation;

(f) propose any statutory or regulatory changes necessary to effect its recommendations; and

(g) produce reports and recommendations to the Steering Committee as they become available; it shall not limit itself to producing one final report.

SEC. 5. [Revoked by Ex. Ord. No. 13138, § 3(c), Sept. 30, 1999, 64 F.R. 53880.]

SEC. 6. *Administration.* (a) All executive departments and agencies shall cooperate with the Commission and provide such assistance, information, and advice to the Commission as it may request, to the extent permitted by law.

In addition, at the Commission's request, executive departments and agencies shall request that existing Federal advisory committees consider and provide advice on issues of critical infrastructure protection, to the extent permitted by law.

(f) The Commission shall terminate 1 year and 90 days from the date of this order, unless extended by the President prior to that date. The Principals Committee, the Steering Committee, and the Advisory Com-

(g) The person who served as Chair of the Commission may continue to be a member of the Steering Committee after termination of the Commission.

SEC. 7. *Review of Commission's Report.* (a) Upon the termination of the Commission as set out in section 6(f) of this order, certain of the Commission's staff may be retained no later than September 30, 1998, solely to assist the Principals, Steering, and Advisory Committees in reviewing the Commission's report and preparing recommendations to the President. SEC. 8. *Interim Coordinating Mission.* (a) While the Commission is conducting its analysis and until the President has an opportunity to consider and act on its recommendations, there is a need to increase coordination of existing infrastructure protection efforts in order to better address, and prevent, crises that would have a debilitating regional or national impact. There is hereby established an Infrastructure Protection Task Force ("IPTF") within the Department of Justice, chaired by the Federal Bureau of Investigation, to undertake this interim coordinating mission.

(b) The IPTF will not supplant any existing programs or organizations.

(c) The Steering Committee shall oversee the work of the IPTF.

(d) The IPTF shall include at least one full-time member each from the Federal Bureau of Investigation, the Department of Defense, and the National Security Agency. It shall also receive part-time assistance from other executive branch departments and agencies. Members shall be designated by their departments or agencies on the basis of their expertise in the protection of critical infrastructures. IPTF members' compensation shall be paid by their parent agency or department.

(e) The IPTF's function is to identify and coordinate existing expertise, inside and outside of the Federal Government, to:

(i) provide, or facilitate and coordinate the provision of, expert guidance to critical infrastructures to detect, prevent, halt, or confine an attack and to recover and restore service;

(ii) issue threat and warning notices in the event advance information is obtained about a threat;

(iii) provide training and education on methods of reducing vulnerabilities and responding to attacks on critical infrastructures;

(iv) conduct after-action analysis to determine possible future threats, targets, or methods of attack; and

(v) coordinate with the pertinent law enforcement authorities during or after an attack to facilitate any resulting criminal investigation.

(f) All executive departments and agencies shall cooperate with the IPTF and provide such assistance, information, and advice as the IPTF may request, to the extent permitted by law.

(g) All executive departments and agencies shall share with the IPTF information about threats and warning of attacks, and about actual attacks on critical infrastructures, to the extent permitted by law.

(h) The IPTF shall terminate no later than 180 days after the termination of the Commission, unless extended by the President prior to that date.

SEC. 9. *General.* (a) This order is not intended to change any existing statutes or Executive orders.

(b) This order is not intended to create any right, benefit, trust, or responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any person.

Ex. Ord. No. 13130, July 14, 1999, 64 F.R. 38535, which established the National Infrastructure Assurance Council, was revoked by Ex. Ord. No. 13231, §10(e)(iii), Oct. 16, 2001, 66 F.R. 53070, set out as a note under section 121 of Title 6, Domestic Security.

EX. ORD. NO. 13151. GLOBAL DISASTER INFORMATION NETWORK

Ex. Ord. No. 13151, Apr. 27, 2000, 65 F.R. 25619, as amended by Ex. Ord. No. 13284, §5, Jan. 23, 2003, 68 F.R. 4075, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to establish a Global Disaster Information Network to use information technology more effectively to reduce loss of life and property from natural and man-made disasters, it is hereby ordered as follows:

SECTION 1. *Policy.* (a) It is the policy of this Administration to use information technology more effectively to coordinate the Federal Government's collection and dissemination of information to appropriate response agencies and State governments to prepare for and respond to natural and man-made disasters (disasters). As a result of changing population demographics in our coastal, rural, and urban areas over the past decades, the loss of life and property (losses) from disasters has nearly doubled. One of the ways the Federal Government can reduce these losses is to use technology more effectively to coordinate its collection and dissemination (hereafter referred to collectively as "provision") of information which can be used in both planning for and recovering from disasters. While many agencies provide disaster-related information, they may not always provide it in a coordinated manner. To improve the provision of disaster-related information, the agencies shall, as set out in this order, use information technology to coordinate the Federal Government's provision of information to prepare for, respond to, and recover from domestic disasters.

(b) It is also the policy of this Administration to use information technology and existing channels of disaster assistance to improve the Federal Government's provision of information that could be helpful to foreign governments preparing for or responding to foreign disasters. Currently, the United States Government provides disaster-related information to foreign governments and relief organizations on humanitarian grounds at the request of foreign governments and where appropriate. This information is supplied by Federal agencies on an ad hoc basis. To increase the effectiveness of our response to foreign disasters, agencies shall, where appropriate, use information technology to coordinate the Federal Government's provision of disaster-related information to foreign governments.

(c) To carry out the policies in this order, there is established the Global Disaster Information Network (Network). The Network is defined as the coordinated effort by Federal agencies to develop a strategy and to use existing technical infrastructure, to the extent per-

mitted by law and subject to the availability of appropriations and under the guidance of the Interagency Coordinating Committee and the Committee Support Office, to make more effective use of information technology to assist our Government, and foreign governments where appropriate, by providing disaster-related information to prepare for and respond to disasters.

SEC. 2. *Establishment.* (a) There is established an Interagency Coordinating Committee (Committee) to provide leadership and oversight for the development of the Network. The Office of the Vice President, the Department of Commerce through the National Oceanic and Atmospheric Administration, and the Department of State, respectively, shall designate a representative to serve as Co-chairpersons of the Committee. The Committee membership shall comprise representatives from the following departments and agencies:

- (1) Department of State;
- (2) Department of Defense;
- (3) Department of the Interior;
- (4) Department of Agriculture;
- (5) Department of Commerce;
- (6) Department of Transportation;
- (7) Department of Energy;
- (8) Department of Homeland Security;
- (9) Office of Management and Budget;
- (10) Environmental Protection Agency;
- (11) National Aeronautics and Space Administration;
- (12) United States Agency for International Development;
- (13) Federal Emergency Management Agency; and
- (14) Central Intelligence Agency.

At the discretion of the Co-chairpersons of the Committee, other agencies may be added to the Committee membership. The Committee shall include an Executive Secretary to effect coordination between the Co-chairpersons of the Committee and the Committee Support Office.

(b) There is established a Committee Support Office (Support Office) to assist the Committee by developing plans and projects that would further the creation of the Network. The Support Office shall, at the request of the Co-chairpersons of the Committee, carry out tasks taken on by the Committee.

(c) The National Oceanic and Atmospheric Administration shall provide funding and administrative support for the Committee and the Support Office. To the extent permitted by law, agencies may provide support to the Committee and the Support Office to assist them in their work.

SEC. 3. *Responsibilities.* (a) The Committee shall:

- (1) serve as the United States Government's single entity for all matters, both national and international, pertaining to the development and establishment of the Network;
 - (2) provide leadership and high-level coordination of Network activities;
 - (3) provide guidance for the development of Network strategies, goals, objectives, policies, and legislation;
 - (4) represent and advocate Network goals, objectives, and processes to their respective agencies and departments;
 - (5) provide manpower and material support for Network development activities;
 - (6) develop, delegate, and monitor interagency opportunities and ideas supporting the development of the Network; and
 - (7) provide reports, through the Co-chairpersons of the Committee, to the President as requested or at least annually.
- (b) The Support Office shall:
- (1) provide management and administrative support for the Committee;
 - (2) develop Network strategies, goals, objectives, policies, plans, and legislation in accordance with guidance provided by the Committee;
 - (3) consult with agencies, States, nongovernment organizations, and international counterparts in developing Network development tasks;

(4) develop and make recommendations concerning Network activities to the agencies as approved by the Committee; and

(5) participate in projects that promote the goals and objectives of the Network.

SEC. 4. *Implementation.* (a) The Committee, with the assistance of the Support Office, shall address national and international issues associated with the development of the Network within the context of:

(1) promoting the United States as an example and leader in the development and dissemination of disaster information, both domestically and abroad, and, to this end, seeking cooperation with foreign governments and international organizations;

(2) striving to include all appropriate stakeholders in the development of the Network; and

(3) facilitating the creation of a framework that involves public and private stakeholders in a partnership for sustained operations of the Network.

(b) Intelligence activities, as determined by the Director of the Central Intelligence Agency, as well as national security-related activities of the Department of Defense and of the Department of Energy, are exempt from compliance with this order.

SEC. 5. *Tribal Governments.* This order does not impose any requirements on tribal governments.

SEC. 6. *Judicial Review.* This order does not create any right or benefit, substantive or procedural, enforceable by law, by a party against the United States, its officers, its employees, or any other person.

§ 5195c. Critical infrastructures protection

(a) Short title

This section may be cited as the “Critical Infrastructures Protection Act of 2001”.

(b) Findings

Congress makes the following findings:

(1) The information revolution has transformed the conduct of business and the operations of government as well as the infrastructure relied upon for the defense and national security of the United States.

(2) Private business, government, and the national security apparatus increasingly depend on an interdependent network of critical physical and information infrastructures, including telecommunications, energy, financial services, water, and transportation sectors.

(3) A continuous national effort is required to ensure the reliable provision of cyber and physical infrastructure services critical to maintaining the national defense, continuity of government, economic prosperity, and quality of life in the United States.

(4) This national effort requires extensive modeling and analytic capabilities for purposes of evaluating appropriate mechanisms to ensure the stability of these complex and interdependent systems, and to underpin policy recommendations, so as to achieve the continuous viability and adequate protection of the critical infrastructure of the Nation.

(c) Policy of the United States

It is the policy of the United States—

(1) that any physical or virtual disruption of the operation of the critical infrastructures of the United States be rare, brief, geographically limited in effect, manageable, and minimally detrimental to the economy, human and government services, and national security of the United States;

(2) that actions necessary to achieve the policy stated in paragraph (1) be carried out in a public-private partnership involving corporate and non-governmental organizations; and

(3) to have in place a comprehensive and effective program to ensure the continuity of essential Federal Government functions under all circumstances.

(d) Establishment of national competence for critical infrastructure protection

(1) Support of critical infrastructure protection and continuity by National Infrastructure Simulation and Analysis Center

There shall be established the National Infrastructure Simulation and Analysis Center (NISAC) to serve as a source of national competence to address critical infrastructure protection and continuity through support for activities related to counterterrorism, threat assessment, and risk mitigation.

(2) Particular support

The support provided under paragraph (1) shall include the following:

(A) Modeling, simulation, and analysis of the systems comprising critical infrastructures, including cyber infrastructure, telecommunications infrastructure, and physical infrastructure, in order to enhance understanding of the large-scale complexity of such systems and to facilitate modification of such systems to mitigate the threats to such systems and to critical infrastructures generally.

(B) Acquisition from State and local governments and the private sector of data necessary to create and maintain models of such systems and of critical infrastructures generally.

(C) Utilization of modeling, simulation, and analysis under subparagraph (A) to provide education and training to policymakers on matters relating to—

(i) the analysis conducted under that subparagraph;

(ii) the implications of unintended or unintentional disturbances to critical infrastructures; and

(iii) responses to incidents or crises involving critical infrastructures, including the continuity of government and private sector activities through and after such incidents or crises.

(D) Utilization of modeling, simulation, and analysis under subparagraph (A) to provide recommendations to policymakers, and to departments and agencies of the Federal Government and private sector persons and entities upon request, regarding means of enhancing the stability of, and preserving, critical infrastructures.

(3) Recipient of certain support

Modeling, simulation, and analysis provided under this subsection shall be provided, in particular, to relevant Federal, State, and local entities responsible for critical infrastructure protection and policy.

(e) Critical infrastructure defined

In this section, the term “critical infrastructure” means systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters.

(f) Authorization of appropriations

There is hereby authorized for the Department of Defense for fiscal year 2002, \$20,000,000 for the Defense Threat Reduction Agency for activities of the National Infrastructure Simulation and Analysis Center under this section in that fiscal year.

(Pub. L. 107-56, title X, §1016, Oct. 26, 2001, 115 Stat. 400.)

CODIFICATION

Section was enacted as the Critical Infrastructures Protection Act of 2001 and also as part of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 or USA PATRIOT Act, and not as part of the Robert T. Stafford Disaster Relief and Emergency Assistance Act which comprises this chapter.

TRANSFER OF FUNCTIONS

For transfer of functions, personnel, assets, and liabilities of the National Infrastructure Simulation and Analysis Center of the Department of Energy, including the functions of the Secretary of Energy relating thereto, to the Secretary of Homeland Security, and for treatment of related references, see sections 121(g)(4), 551(d), 552(d), and 557 of Title 6, Domestic Security, and the Department of Homeland Security Reorganization Plan of November 25, 2002, as modified, set out as a note under section 542 of Title 6.

The consent of Congress is deemed to be granted to each such compact upon the expiration of the 60-day period beginning on the date on which the compact is transmitted to Congress.

§ 5301. Congressional findings and declaration of purpose

(a) Critical social, economic, and environmental problems facing Nation's urban communities

The Congress finds and declares that the Nation's cities, towns, and smaller urban communities face critical social, economic, and environmental problems arising in significant measure from—

(1) the growth of population in metropolitan and other urban areas, and the concentration of persons of lower income in central cities;

(2) inadequate public and private investment and reinvestment in housing and other physical facilities, and related public and social services, resulting in the growth and persistence of urban slums and blight and the marked deterioration of the quality of the urban environment; and

(3) increasing energy costs which have seriously undermined the quality and overall effectiveness of local community and housing development activities.

(b) Establishment and maintenance of viable urban communities; systematic and sustained action by Federal, State, and local governments; expansion of and continuity in Federal assistance; increased private investment; streamlining programs and improvement of functioning of agencies; action to address consequences of scarce fuel supplies

The Congress further finds and declares that the future welfare of the Nation and the well-being of its citizens depend on the establishment and maintenance of viable urban communities as social, economic, and political entities, and require—

(1) systematic and sustained action by Federal, State, and local governments to elimi-

nate blight, to conserve and renew older urban areas, to improve the living environment of low- and moderate-income families, and to develop new centers of population growth and economic activity;

(2) substantial expansion of and greater continuity in the scope and level of Federal assistance, together with increased private investment in support of community development activities;

(3) continuing effort at all levels of government to streamline programs and improve the functioning of agencies responsible for planning, implementing, and evaluating community development efforts; and

(4) concerted action by Federal, State, and local governments to address the economic and social hardships borne by communities as a consequence of scarce fuel supplies.

(c) Decent housing, suitable living environment, and economic opportunities for persons of low and moderate income; community development activities which may be supported by Federal assistance

The primary objective of this chapter and of the community development program of each grantee under this chapter is the development of viable urban communities, by providing decent housing and a suitable living environment and expanding economic opportunities, principally for persons of low and moderate income. Consistent with this primary objective, not less than 70 percent of the aggregate of the Federal assistance provided to States and units of general local government under section 5306 of this title and, if applicable, the funds received as a result of a guarantee or a grant under section 5308 of this title, shall be used for the support of activities that benefit persons of low and moderate income, and the Federal assistance provided in this chapter is for the support of community development activities which are directed toward the following specific objectives—

(1) the elimination of slums and blight and the prevention of blighting influences and the deterioration of property and neighborhood and community facilities of importance to the welfare of the community, principally persons of low and moderate income;

(2) the elimination of conditions which are detrimental to health, safety, and public welfare, through code enforcement, demolition, interim rehabilitation assistance, and related activities;

(3) the conservation and expansion of the Nation's housing stock in order to provide a decent home and a suitable living environment for all persons, but principally those of low and moderate income;

(4) the expansion and improvement of the quantity and quality of community services, principally for persons of low and moderate income, which are essential for sound community development and for the development of viable urban communities;

(5) a more rational utilization of land and other natural resources and the better arrangement of residential, commercial, industrial, recreational, and other needed activity centers;

(6) the reduction of the isolation of income groups within communities and geographical areas and the promotion of an increase in the diversity and vitality of neighborhoods through the spatial deconcentration of housing opportunities for persons of lower income and the revitalization of deteriorating or deteriorated neighborhoods;

(7) the restoration and preservation of properties of special value for historic, architectural, or esthetic reasons;

(8) the alleviation of physical and economic distress through the stimulation of private investment and community revitalization in areas with population outmigration or a stagnating or declining tax base; and

(9) the conservation of the Nation's scarce energy resources, improvement of energy efficiency, and the provision of alternative and renewable energy sources of supply.

It is the intent of Congress that the Federal assistance made available under this chapter not be utilized to reduce substantially the amount of local financial support for community development activities below the level of such support prior to the availability of such assistance.

(d) Consolidation of complex and overlapping Federal assistance programs into consistent system of Federal aid

It is also the purpose of this chapter to further the development of a national urban growth policy by consolidating a number of complex and overlapping programs of financial assistance to communities of varying sizes and needs into a consistent system of Federal aid which—

(1) provides assistance on an annual basis, with maximum certainty and minimum delay, upon which communities can rely in their planning;

(2) encourages community development activities which are consistent with comprehensive local and areawide development planning;

(3) furthers achievement of the national housing goal of a decent home and a suitable living environment for every American family; and

(4) fosters the undertaking of housing and community development activities in a coordinated and mutually supportive manner by Federal agencies and programs, as well as by communities.

“(b) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this Act [Oct. 21, 1998].”

FINDINGS AND PURPOSE

Section 2 of Pub. L. 100-242 provided that:

“(a) FINDINGS.—The Congress finds that—

“(1) for the past 50 years, the Federal Government has taken the leading role in enabling the people of the Nation to be the best housed in the world, and recent reductions in Federal assistance have contributed to a deepening housing crisis for low- and moderate-income families;

“(2) the efforts of the Federal Government have included a system of specialized lending institutions, favorable tax policies, construction assistance, mortgage insurance, loan guarantees, secondary markets, and interest and rental subsidies, that have enabled people to rent or buy affordable, decent, safe, and sanitary housing; and

“(3) the tragedy of homelessness in urban and suburban communities across the Nation, involving a record number of people, dramatically demonstrates the lack of affordable residential shelter, and people living on the economic margins of our society (lower income families, the elderly, the working poor, and the deinstitutionalized) have few available alternatives for shelter.

“(b) PURPOSE.—The purpose of this Act [see Short Title of 1988 Amendment note above], therefore, is—

“(1) to reaffirm the principle that decent and affordable shelter is a basic necessity, and the general welfare of the Nation and the health and living standards of its people require the addition of new housing units to remedy a serious shortage of housing units for all Americans, particularly for persons of low and moderate income;

“(2) to make the distribution of direct and indirect housing assistance more equitable by providing Federal assistance for the less affluent people of the Nation;

“(3) to provide needed housing assistance for homeless people and for persons of low and moderate income who lack affordable, decent, safe, and sanitary housing; and

“(4) to reform existing programs to ensure that such assistance is delivered in the most efficient manner possible.”

BUDGET COMPLIANCE

Section 3 of Pub. L. 100-242 provided that:

“(a) IN GENERAL.—This Act and the amendments made by this Act [see Short Title of 1988 Amendment note above] may not be construed to provide for new budget authority, budget outlays, or new entitlement authority, for fiscal year 1988 in excess of the appropriate aggregate levels established by the concurrent resolution on the budget for such fiscal year for the programs authorized by this Act and the amendments made by this Act.

“(b) DEFINITIONS.—For purposes of this section, the terms ‘budget authority’, ‘budget outlays’, ‘concurrent resolution on the budget’, and ‘entitlement authority’ have the meanings given such terms in section 3 of the Congressional Budget Act of 1974 (2 U.S.C. 622).”

CREDIT LIMITATION

Section 4 of Pub. L. 100-242 provided that: “Any new credit authority (as defined in section 3 of the Congressional Budget Act of 1974 [2 U.S.C. 622]) which is provided by this Act [see Short Title of 1988 Amendment note above], or by an amendment made by this Act, shall be effective only to such extent or in such amounts as are provided in appropriation Acts.”

LIMITATION ON SPENDING AUTHORITY

Section 5 of Pub. L. 100-242 provided that: “Any new spending authority (as defined in section 401(c) of the Congressional Budget Act of 1974 [2 U.S.C. 651(c)]) which is provided by this Act, or by an amendment

made by this Act [see Short Title of 1988 Amendment note above], shall be effective only to such extent or in such amounts as are provided in appropriation Acts.”

Any city classified as a metropolitan city pursuant to this paragraph, and that no longer qualifies as a metropolitan city in a fiscal year beginning after fiscal year 1989, shall retain its classification as a metropolitan city for such fiscal year and the succeeding fiscal year, except that in such succeeding fiscal year (A) the amount of the grant to such city shall be 50 percent of the amount calculated under section 5306(b) of this title; and (B) the remaining 50 percent shall be added to the amount allocated under section 5306(d) of this title to the State in which the city is located and the city shall be eligible in such succeeding fiscal year to receive a distribution from the State allocation under section 5306(d) of this title as increased by this sentence. Any unit of general local government that was classified as a metropolitan city in any fiscal year, may, upon submission of written notification to the Secretary, relinquish such classification for all purposes under this chapter if it elects to have its population included with the population of a county for purposes of qualifying for assistance (for such following fiscal year) under section 5306 of this title as an urban county under paragraph (6)(D). Any metropolitan city that elects to relinquish its classification under the preceding sentence and whose port authority shipped at least 35,000,000 tons of cargo in 1988, of which iron ore made up at least half, shall not receive, in any fiscal year, a total amount of assistance under section 5306 of this title from the urban county recipient that is less than the city would have received if it had not relinquished the classification under the preceding sentence.

(5) The term "city" means (A) any unit of general local government which is classified as a municipality by the United States Bureau of the Census or (B) any other unit of general local government which is a town or township and which, in the determination of the Secretary, (i) possesses powers and performs functions comparable to these associated with municipalities, (ii) is closely settled, and (iii) contains within its boundaries no incorporated places as defined by the United States Bureau of the Census which have not entered into cooperation agreements with such town or township to undertake or to assist in the undertaking of essential community development and housing assistance activities.

(B) Any county that was classified as an urban county for at least 2 years pursuant to subparagraph (A), (C), or (D) shall remain classified as an urban county, unless it fails to qualify as an urban county pursuant to subparagraph (A) by reason of the election of any unit of general local government included in such county to have its population excluded under clause (ii)(I)(a) of subparagraph (A) or not to renew a cooperation agreement under clause (ii)(I)(b) of such subparagraph.

(C) Notwithstanding the combined population amount set forth in clause (ii) of subparagraph (A), a county shall also qualify as an urban county for purposes of assistance under section 5306 of this title if such county—

(viii) notwithstanding any other provision of this section, any county that was classified as an urban county pursuant to subparagraph (A) for fiscal year 1999, at the option of the county, may hereafter remain classified as an urban county for purposes of this Act.

(E) Any county classified as an urban county pursuant to subparagraph (A), (B), or (C) of this paragraph, and that no longer qualifies as an urban county under such subparagraph in a fiscal year beginning after fiscal year 1989, shall retain its classification as an urban county for such fiscal year and the succeeding fiscal year, except that in such succeeding fiscal year (i) the amount of the grant to such an urban county shall be 50 percent of the amount calculated under section 5306(b) of this title; and (ii) the remaining 50 percent shall be added to the amount allocated under section 5306(d) of this title to the State in which the urban county is located and the urban county shall be eligible in such succeeding fiscal year to receive a distribution from the State allocation under section 5306(d) of this title as increased by this sentence.

§ 5304. Statement of activities and review

(a) Statement of objectives and projected use of funds by grantee prerequisite to receipt of grant; publication of proposals by grantees; notice and comment; citizen participation plan

(1) Prior to the receipt in any fiscal year of a grant under section 5306(b) of this title by any metropolitan city or urban county, under section 5306(d) of this title by any State, under section 5306(d)(2)(B) of this title by any unit of general local government, or under section 5306(a)(3) of this title by any insular area, the grantee shall have prepared a final statement of community development objectives and projected use of funds and shall have provided the Secretary with the certifications required in subsection (b) of this section and, where appropriate, subsection (c) of this section. In the case of metropolitan cities and urban counties receiving grants pursuant to section 5306(b) of this title, units of general local government receiving grants pursuant to section 5306(d)(2)(B) of this title, and insular areas receiving grants pursuant to section 5306(a)(3) of this title, the statement of projected use of funds shall consist of proposed community development activities. In the case of States receiving grants pursuant to section 5306(d) of this title, the statement of projected use of funds shall consist of the method by which the States will distribute funds to units of general local government.

(2) In order to permit public examination and appraisal of such statements, to enhance the

public accountability of grantees, and to facilitate coordination of activities with different levels of government, the grantee shall in a timely manner—

(A) furnish citizens or, as appropriate, units of general local government information concerning the amount of funds available for proposed community development and housing activities and the range of activities that may be undertaken, including the estimated amount proposed to be used for activities that will benefit persons of low and moderate income and the plans of the grantee for minimizing displacement of persons as a result of activities assisted with such funds and to assist persons actually displaced as a result of such activities;

(B) publish a proposed statement in such manner to afford affected citizens or, as appropriate, units of general local government an opportunity to examine its content and to submit comments on the proposed statement and on the community development performance of the grantee;

(C) hold one or more public hearings to obtain the views of citizens on community development and housing needs;

(D) provide citizens or, as appropriate, units of general local government with reasonable access to records regarding the past use of funds received under section 5306 of this title by the grantee; and

(E) provide citizens or, as appropriate, units of general local government with reasonable notice of, and opportunity to comment on, any substantial change proposed to be made in the use of funds received under section 5306 of this title from one eligible activity to another or in the method of distribution of such funds.

In preparing the final statement, the grantee shall consider any such comments and views and may, if deemed appropriate by the grantee, modify the proposed statement. The final statement shall be made available to the public, and a copy shall be furnished to the Secretary together with the certifications required under subsection (b) of this section and, where appropriate, subsection (c) of this section. Any final statement of activities may be modified or amended from time to time by the grantee in accordance with the same procedures required in this paragraph for the preparation and submission of such statement.

(3) A grant under section 5306 of this title may be made only if the grantee certifies that it is following a detailed citizen participation plan which—

(A) provides for and encourages citizen participation, with particular emphasis on participation by persons of low and moderate income who are residents of slum and blight areas and of areas in which section 106 [42 U.S.C. 5306] funds are proposed to be used, and in the case of a grantee described in section 5306(a) of this title, provides for participation of residents in low and moderate income neighborhoods as defined by the local jurisdiction;

(B) provides citizens with reasonable and timely access to local meetings, information, and records relating to the grantee's proposed

use of funds, as required by regulations of the Secretary, and relating to the actual use of funds under this chapter;

(C) provides for technical assistance to groups representative of persons of low and moderate income that request such assistance in developing proposals with the level and type of assistance to be determined by the grantee;

(D) provides for public hearings to obtain citizen views and to respond to proposals and questions at all stages of the community development program, including at least the development of needs, the review of proposed activities, and review of program performance, which hearings shall be held after adequate notice, at times and locations convenient to potential or actual beneficiaries, and with accommodation for the handicapped;

(E) provides for a timely written answer to written complaints and grievances, within 15 working days where practicable; and

(F) identifies how the needs of non-English speaking residents will be met in the case of public hearings where a significant number of non-English speaking residents can be reasonably expected to participate.

This paragraph may not be construed to restrict the responsibility or authority of the grantee for the development and execution of its community development program.

(b) Certification of enumerated criteria by grantee to Secretary

Any grant under section 5306 of this title shall be made only if the grantee certifies to the satisfaction of the Secretary that—

(1) the grantee is in full compliance with the requirements of subsection (a)(2)(A), (B), and (C) of this section and has made the final statement available to the public;

(3) the projected use of funds has been developed so as to give maximum feasible priority to activities which will benefit low- and moderate-income families or aid in the prevention or elimination of slums or blight, and the projected use of funds may also include activities which the grantee certifies are designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available to meet such needs, except that (A) the aggregate use of funds received under section 5306 of this title and, if applicable, as a result of a guarantee or a grant under section 5308 of this title, during a period specified by the grantee of not more than 3 years, shall principally benefit persons of low and moderate income in a manner that ensures that not less than 70 percent of such funds are used for activities that benefit such persons during such period; and (B) a grantee that borders on the Great Lakes and that experiences signifi-

cant adverse financial and physical effects due to lakefront erosion or flooding may include in the projected use of funds activities that are clearly designed to alleviate the threat posed, and rectify the damage caused, by such erosion or flooding if such activities will principally benefit persons of low and moderate income and the grantee certifies that such activities are necessary to meet other needs having a particular urgency;

(4) it has developed a community development plan pursuant to subsection (m) of this section, for the period specified by the grantee under paragraph (3), that identifies community development needs and specifies both short- and long-term community development objectives that have been developed in accordance with the primary objective and requirements of this chapter;

(5) the grantee will not attempt to recover any capital costs of public improvements assisted in whole or part under section 5306 of this title or with amounts resulting from a guarantee under section 5308 of this title by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements, unless (A) funds received under section 5306 of this title are used to pay the proportion of such fee or assessment that relates to the capital costs of such public improvements that are financed from revenue sources other than under this chapter; or (B) for purposes of assessing any amount against properties owned and occupied by persons of moderate income, the grantee certifies to the Secretary that it lacks sufficient funds received under section 5306 of this title to comply with the requirements of subparagraph (A); and

(6) the grantee will comply with the other provisions of this chapter and with other applicable laws.

(c) Special certifications required for certain grants

A grant may be made under section 5306(b) of this title only if the unit of general local government certifies that it is following—

(1) a current housing affordability strategy which has been approved by the Secretary in accordance with section 12705 of this title, or

(2) a housing assistance plan which was approved by the Secretary during the 180-day period beginning on November 28, 1990, or during such longer period as may be prescribed by the Secretary in any case for good cause.

(d) Residential antidisplacement and relocation assistance plan; certification of adherence; contents

(1) A grant under section 5306 or 5318 of this title may be made only if the grantee certifies that it is following a residential antidisplacement and relocation assistance plan. A grantee receiving a grant under section 5306(a) of this title or section 5318 of this title shall so certify to the Secretary. A unit of general local government receiving amounts from a State under section 5306(d) of this title shall so certify to the State, and a unit of general local govern-

ment receiving amounts from the Secretary under section 5306(d) of this title shall so certify to the Secretary.

(2) The residential antidisplacement and relocation assistance plan shall in connection with a development project assisted under section 5306 or 5318 of this title—

(A) in the event of such displacement, provide that—

(i) governmental agencies or private developers shall provide within the same community comparable replacement dwellings for the same number of occupants as could have been housed in the occupied and vacant occupiable low and moderate income dwelling units demolished or converted to a use other than for housing for low and moderate income persons, and provide that such replacement housing may include existing housing assisted with project based assistance provided under section 1437f of this title;

(ii) such comparable replacement dwellings shall be designed to remain affordable to persons of low and moderate income for 10 years from the time of initial occupancy;

(iii) relocation benefits shall be provided for all low or moderate income persons who occupied housing demolished or converted to a use other than for low or moderate income housing, including reimbursement for actual and reasonable moving expenses, security deposits, credit checks, and other moving-related expenses, including any interim living costs; and in the case of displaced persons of low and moderate income, provide either—

(I) compensation sufficient to ensure that, for a 5-year period, the displaced families shall not bear, after relocation, a ratio of shelter costs to income that exceeds 30 percent; or

(II) if elected by a family, a lump-sum payment equal to the capitalized value of the benefits available under subclause (I) to permit the household to secure participation in a housing cooperative or mutual housing association; and

(iv) persons displaced shall be relocated into comparable replacement housing that is—

- (I) decent, safe, and sanitary;
- (II) adequate in size to accommodate the occupants;

- (IV) in an area not subject to unreasonably adverse environmental conditions;

(B) provide that persons displaced shall have the right to elect, as an alternative to the benefits under this subsection, to receive benefits under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seq.) if such persons determine that it is in their best interest to do so; and

(C) provide that where a claim for assistance under subparagraph (A)(iv) is denied by a grantee, the claimant may appeal to the Secretary in the case of a grant under section 5306 or 5318 of this title or to the appropriate State official in the case of a grant under section 5306(d) of this title, and that the decision of

the Secretary or the State official shall be final unless a court determines the decision was arbitrary and capricious.

(3) Paragraphs (2)(A)(i) and (2)(A)(ii) shall not apply in any case in which the Secretary finds, on the basis of objective data, that there is available in the area an adequate supply of habitable affordable housing for low and moderate income persons. A determination under this paragraph is final and nonreviewable.

(e) Submission of performance and evaluation report by grantee to Secretary; contents; availability for citizen comment; annual review and audit by Secretary of program implementation; adjustments in amount of annual grants

Each grantee shall submit to the Secretary, at a time determined by the Secretary, a performance and evaluation report concerning the use of funds made available under section 5306 of this title, together with an assessment by the grantee of the relationship of such use to the objectives identified in the grantee's statement under subsection (a) of this section and to the requirements of subsection (b)(3) of this section. Such report shall also be made available to the citizens in each grantee's jurisdiction in sufficient time to permit such citizens to comment on such report prior to its submission, and in such manner and at such times as the grantee may determine. The grantee's report shall indicate its programmatic accomplishments, the nature of and reasons for changes in the grantee's program objectives, indications of how the grantee would change its programs as a result of its experiences, and an evaluation of the extent to which its funds were used for activities that benefited low- and moderate-income persons. The report shall include a summary of any comments received by the grantee from citizens in its jurisdiction respecting its program. The Secretary shall encourage and assist national associations of grantees eligible under section 5306(d)(2)(B) of this title, national associations of States, and national associations of units of general local government in nonentitlement areas to develop and recommend to the Secretary, within one year after November 30, 1983, uniform recordkeeping, performance reporting, and evaluation reporting, and auditing requirements for such grantees, States, and units of general local government, respectively. Based on the Secretary's approval of these recommendations, the Secretary shall establish such requirements for use by such grantees, States, and units of general local government. The Secretary shall, at least on an annual basis, make such reviews and audits as may be necessary or appropriate to determine—

(1) in the case of grants made under subsection (a)(3), (b), or (d)(2)(B) of section 5306 of this title, whether the grantee has carried out its activities and, where applicable, its housing assistance plan in a timely manner, whether the grantee has carried out those activities and its certifications in accordance with the requirements and the primary objectives of this chapter and with other applicable laws, and whether the grantee has a continuing capacity to carry out those activities in a timely manner; and

(2) in the case of grants to States made under section 5306(d) of this title, whether the State has distributed funds to units of general local government in a timely manner and in conformance to the method of distribution described in its statement, whether the State has carried out its certifications in compliance with the requirements of this chapter and other applicable laws, and whether the State has made such reviews and audits of the units of general local government as may be necessary or appropriate to determine whether they have satisfied the applicable performance criteria described in paragraph (1) of this subsection.

The Secretary may make appropriate adjustments in the amount of the annual grants in accordance with the Secretary's findings under this subsection. With respect to assistance made available to units of general local government under section 5306(d) of this title, the Secretary may adjust, reduce, or withdraw such assistance, or take other action as appropriate in accordance with the Secretary's reviews and audits under this subsection, except that funds already expended on eligible activities under this chapter shall not be recaptured or deducted from future assistance to such units of general local government.

(f) Audit of grantees by Government Accountability Office; access to books, accounts, records, etc., by representatives of Government Accountability Office

Insofar as they relate to funds provided under this chapter, the financial transactions of recipients of such funds may be audited by the Government Accountability Office under such rules and regulations as may be prescribed by the Comptroller General of the United States. The representatives of the Government Accountability Office shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to or in use by such recipients pertaining to such financial transactions and necessary to facilitate the audit.

(g) Environmental protection measures applicable for release of funds to applicants for projects; issuance of regulations by Secretary subsequent to consultation with Council on Environmental Quality; request and certification to Secretary for approval of release of funds; form, contents and effect of certification

(1) In order to assure that the policies of the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] and other provisions of law which further the purposes of such Act (as specified in regulations issued by the Secretary) are most effectively implemented in connection with the expenditure of funds under this chapter, and to assure to the public undiminished protection of the environment, the Secretary, in lieu of the environmental protection procedures otherwise applicable, may under regulations provide for the release of funds for particular projects to recipients of assistance under this chapter who assume all of the responsibilities for environmental review, decisionmaking, and

action pursuant to such Act, and such other provisions of law as the regulations of the Secretary specify, that would apply to the Secretary were he to undertake such projects as Federal projects. The Secretary shall issue regulations to carry out this subsection only after consultation with the Council on Environmental Quality.

(2) The Secretary shall approve the release of funds for projects subject to the procedures authorized by this subsection only if, at least fifteen days prior to such approval and prior to any commitment of funds to such projects other than for purposes authorized by section 5305(a)(12) of this title or for environmental studies, the recipient of assistance under this chapter has submitted to the Secretary a request for such release accompanied by a certification which meets the requirements of paragraph (3). The Secretary's approval of any such certification shall be deemed to satisfy his responsibilities under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] and such other provisions of law as the regulations of the Secretary specify insofar as those responsibilities relate to the releases of funds for projects to be carried out pursuant thereto which are covered by such certification.

(3) A certification under the procedures authorized by this subsection shall—

(A) be in a form acceptable to the Secretary,

(B) be executed by the chief executive officer or other officer of the recipient of assistance under this chapter qualified under regulations of the Secretary,

(C) specify that the recipient of assistance under this chapter has fully carried out its responsibilities as described under paragraph (1) of this subsection, and

(D) specify that the certifying officer (i) consents to assume the status of a responsible Federal official under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] and each provision of law specified in regulations issued by the Secretary insofar as the provisions of such Act or other such provision of law apply pursuant to paragraph (1) of this subsection, and (ii) is authorized and consents on behalf of the recipient of assistance under this chapter and himself to accept the jurisdiction of the Federal courts for the purpose of enforcement of his responsibilities as such an official.

(4) In the case of grants made to States pursuant to section 5306(d) of this title, the State shall perform those actions of the Secretary described in paragraph (2) and the performance of such actions shall be deemed to satisfy the Secretary's responsibilities referred to in the second sentence of such paragraph.

(h) Payments; revolving loan fund; establishment in private financial institution for rehabilitation activities; standards for payments; criteria

(1) Units of general local government receiving assistance under this chapter may receive funds, in one payment, in an amount not to exceed the total amount designated in the grant (or, in the case of a unit of general local government receiving a distribution from a State pursuant to

section 5306(d) of this title, not to exceed the total amount of such distribution) for use in establishing a revolving loan fund which is to be established in a private financial institution and which is to be used to finance rehabilitation activities assisted under this chapter. Rehabilitation activities authorized under this section shall begin within 45 days after receipt of such payment and substantial disbursements from such fund must begin within 180 days after receipt of such payment.

(2) The Secretary shall establish standards for such cash payments which will insure that the deposits result in appropriate benefits in support of the recipient's rehabilitation program. These standards shall be designed to assure that the benefits to be derived from the local program include, at a minimum, one or more of the following elements, or such other criteria as determined by the Secretary—

(A) leverage of community development block grant funds so that participating financial institutions commit private funds for loans in the rehabilitation program in amounts substantially in excess of deposit of community development funds;

(B) commitment of private funds for rehabilitation loans at below-market interest rates or with repayment periods lengthened or at higher risk than would normally be taken;

(C) provision of administrative services in support of the rehabilitation program by the participating lending institutions; and

(D) interest earned on such cash deposits shall be used in a manner which supports the community rehabilitation program.

(i) Metropolitan city as part of urban county

In any case in which a metropolitan city is located, in whole or in part, within an urban county, the Secretary may, upon the joint request of such city and county, approve the inclusion of the metropolitan city as part of the urban county for purposes of submitting a statement under subsection (a) of this section and carrying out activities under this chapter.

(j) Retention of program income; condition of distribution

Notwithstanding any other provision of law, any unit of general local government may retain any program income that is realized from any grant made by the Secretary, or any amount distributed by a State, under section 5306 of this title if (1) such income was realized after the initial disbursement of the funds received by such unit of general local government under such section; and (2) such unit of general local government has agreed that it will utilize the program income for eligible community development activities in accordance with the provisions of this chapter; except that the Secretary may, by regulation, exclude from consideration as program income any amounts determined to be so small that compliance with this subsection creates an unreasonable administrative burden on the unit of general local government. A State may require as a condition of any amount distributed by such State under section 5306(d) of this title that a unit of general local government shall pay to such State any such income to be used by such State to fund additional eligible commu-

nity development activities, except that such State shall waive such condition to the extent such income is applied to continue the activity from which such income was derived.

(k) Provision of benefits to displaced persons

Each grantee shall provide for reasonable benefits to any person involuntarily and permanently displaced as a result of the use of assistance received under this chapter to acquire or substantially rehabilitate property.

(l) Protection of individuals engaging in non-violent civil rights demonstrations

No funds authorized to be appropriated under section 5303 of this title may be obligated or expended to any unit of general local government that—

(1) fails to adopt and enforce a policy prohibiting the use of excessive force by law enforcement agencies within its jurisdiction against any individuals engaged in nonviolent civil rights demonstrations; or

(2) fails to adopt and enforce a policy of enforcing applicable State and local laws against physically barring entrance to or exit from a facility or location which is the subject of such nonviolent civil rights demonstration within its jurisdiction.

(m) Community development plans

(1) In general

Prior to the receipt in any fiscal year of a grant from the Secretary under subsection (a)(2), (b), (d)(1), or (d)(2)(B) of section 5306 of this title, each recipient shall have prepared and submitted in accordance with this subsection and in such standardized form as the Secretary shall, by regulation, prescribe a description of its priority nonhousing community development needs eligible for assistance under this chapter.

(2) Local governments

In the case of a recipient that is a unit of general local government other than an insular area—

(A) prior to the submission required by paragraph (1), the recipient shall, to the extent practicable, notify adjacent units of general local government and solicit the views of citizens on priority nonhousing community development needs; and

(B) the description required under paragraph (1) shall be submitted to the Secretary, the State, and any other unit of general local government within which the recipient is located, in such standardized form as the Secretary shall, by regulation, prescribe.

(3) States

In the case of a recipient that is a State, the description required by paragraph (1)—

(A) shall include only the needs within the State that affect more than one unit of general local government and involve activities typically funded by such States under this chapter; and

(B) shall be submitted to the Secretary in such standard form as the Secretary, by regulation, shall prescribe.

(4) Effect of submission

WAIVER OF LIMITATION ON AMOUNT OF FUNDS WHICH MAY BE USED IN FISCAL YEARS 1982, 1983, AND 1984 FOR PUBLIC SERVICE ACTIVITIES

Section 303(b) of Pub. L. 97-35, as amended Pub. L. 98-181, title I, §105(b)(2), Nov. 30, 1983, 97 Stat. 1164, authorized Secretary, in fiscal years 1982 and 1983, to waive the limitation on amount of funds which could be used for public services activities under subsec. (a)(8) of this section, in the case of a unit of general local government which, during fiscal year 1981, allocated more than 10 per centum of funds received under this chapter for such activities.

§ 5306. Allocation and distribution of funds

(a) Amounts allocated to Indian tribes, discretionary fund, and metropolitan cities and urban counties; limitations on amount of annual grants

(1) For each fiscal year, of the amount approved in appropriation Acts under section 5303 of this title for grants for such fiscal year (excluding the amounts provided for use in accordance with section 5307 of this title), the Secretary shall reserve for grants to Indian tribes 1 percent of the amount appropriated under such section. The Secretary shall provide for distribution of amounts under this paragraph to Indian tribes on the basis of a competition con-

ducted pursuant to specific criteria for the selection of Indian tribes to receive such amounts. The criteria shall be contained in a regulation promulgated by the Secretary after notice and public comment. Notwithstanding any other provision of this Act, such grants to Indian tribes shall not be subject to the requirements of section 5304 of this title, except subsections (f), (g), and (k) of such section.

(2) For each fiscal year, of the amount approved in appropriation Acts under section 5303 of this title for grants for such fiscal year (excluding the amounts provided for use in accordance with section 5307 of this title), the Secretary shall reserve for grants to insular areas \$7,000,000. The Secretary shall provide for distribution of amounts under this paragraph to insular areas on the basis of the ratio of the population of each insular area to the population of all insular areas. In determining the distribution of amounts to insular areas, the Secretary may also include other statistical criteria as data become available from the Bureau of the Census, but only if such criteria are contained in a regulation promulgated by the Secretary after notice and public comment.

(3) After reserving such amounts for Indian tribes under paragraph (1) and after reserving such amounts for insular areas under paragraph (2), the Secretary shall allocate amounts provided for use under section 5307 of this title.

(4) Of the amount remaining after allocations pursuant to paragraphs (1), (2), and (3), 70 percent shall be allocated by the Secretary to metropolitan cities and urban counties. Except as otherwise specifically authorized, each metropolitan city and urban county shall be entitled to an annual grant from such allocation in an amount not exceeding its basic amount computed pursuant to paragraph (1) or (2) of subsection (b) of this section.

(b) Computation of amount allocated to metropolitan cities and urban counties

(1) The Secretary shall determine the amount to be allocated to each metropolitan city which shall be the greater of an amount that bears the same ratio to the allocation for all metropolitan areas as either—

- (A) the average of the ratios between—
 - (i) the population of that city and the population of all metropolitan areas;
 - (ii) the extent of poverty in that city and the extent of poverty in all metropolitan areas; and
 - (iii) the extent of housing overcrowding in that city and the extent of housing overcrowding in all metropolitan areas; or
- (B) the average of the ratios between—
 - (i) the extent of growth lag in that city and the extent of growth lag in all metropolitan cities;
 - (ii) the extent of poverty in that city and the extent of poverty in all metropolitan areas; and
 - (iii) the age of housing in that city and the age of housing in all metropolitan areas.

(2) The Secretary shall determine the amount to be allocated to each urban county, which shall be the greater of an amount that bears the

same ratio to the allocation for all metropolitan areas as either—

- (A) the average of the ratios between—
 - (i) the population of that urban county and the population of all metropolitan areas;
 - (ii) the extent of poverty in that urban county and the extent of poverty in all metropolitan areas; and
 - (iii) the extent of housing overcrowding in that urban county and the extent of housing overcrowding in all metropolitan areas; or
- (B) the average of the ratios between—
 - (i) the extent of growth lag in that urban county and the extent of growth lag in all metropolitan cities and urban counties;
 - (ii) the extent of poverty in that urban county and the extent of poverty in all metropolitan areas; and
 - (iii) the age of housing in that urban county and the age of housing in all metropolitan areas.

(3) In determining the average of ratios under paragraphs (1)(A) and (2)(A), the ratio involving the extent of poverty shall be counted twice, and each of the other ratios shall be counted once; and in determining the average of ratios under paragraphs (1)(B) and (2)(B), the ratio involving the extent of growth lag shall be counted once, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving the age of housing shall be counted two and one-half times.

(4) In computing amounts or exclusions under this section with respect to any urban county, there shall be excluded units of general local government located in the county the populations of which are not counted in determining the eligibility of the urban county to receive a grant under this subsection, except that there shall be included any independent city (as defined by the Bureau of the Census) which—

- (A) is not part of any county;
- (B) is not eligible for a grant pursuant to subsection (b)(1) of this section;
- (C) is contiguous to the urban county;
- (D) has entered into cooperation agreements with the urban county which provide that the urban county is to undertake or to assist in the undertaking of essential community development and housing assistance activities with respect to such independent city; and
- (E) is not included as a part of any other unit of general local government for purposes of this section.

Any independent city which is included in any fiscal year for purposes of computing amounts pursuant to the preceding sentence shall not be eligible to receive assistance under subsection (d) of this section with respect to such fiscal year.

(5) In computing amounts under this section with respect to any urban county, there shall be included all of the area of any unit of local government which is part of, but is not located entirely within the boundaries of, such urban county if the part of such unit of local government which is within the boundaries of such urban county would otherwise be included in computing the amount for such urban county under this section, and if the part of such unit

of local government which is not within the boundaries of such urban county is not included as a part of any other unit of local government for the purpose of this section. Any amount received by such urban county under this section may be used with respect to the part of such unit of local government which is outside the boundaries of such urban county.

(6)(A) Where data are available, the amount determined under paragraph (1) for a metropolitan city that has been formed by the consolidation of one or more metropolitan cities with an urban county shall be equal to the sum of the amounts that would have been determined under paragraph (1) for the metropolitan city or cities and the balance of the consolidated government, if such consolidation had not occurred. This paragraph shall apply only to any consolidation that—

- (i) included all metropolitan cities that received grants under this section for the fiscal year preceding such consolidation and that were located within the urban county;
- (ii) included the entire urban county that received a grant under this section for the fiscal year preceding such consolidation; and
- (iii) took place on or after January 1, 1983.

(B) The population growth rate of all metropolitan cities referred to in section 5302(a)(12) of this title shall be based on the population of (i) metropolitan cities other than consolidated governments the grant for which is determined under this paragraph; and (ii) cities that were metropolitan cities before their incorporation into consolidated governments. For purposes of calculating the entitlement share for the balance of the consolidated government under this paragraph, the entire balance shall be considered to have been an urban county.

(c) Reallocation of undistributed funds within same metropolitan area as original allocation; amount and calculation of reallocation grant; disaster relief

(1) Except as provided in paragraphs (2) and (4), any amounts allocated to a metropolitan city or an urban county pursuant to the preceding provisions of this section which are not received by the city or county for a fiscal year because of failure to meet the requirements of subsection (a), (b), (c), or (d) of section 5304 of this title, or which become available as a result of actions under section 5304(e) or 5311 of this title, shall be reallocated in the succeeding fiscal year to the other metropolitan cities and urban counties in the same metropolitan area which certify to the satisfaction of the Secretary that they would be adversely affected by the loss of such amounts from the metropolitan area. The amount of the share of funds reallocated under this paragraph for any metropolitan city or urban county shall bear the same ratio to the total of such reallocated funds in the metropolitan area as the amount of funds awarded to the city or county for the fiscal year in which the reallocated funds become available bears to the total amount of funds awarded to all metropolitan cities and urban counties in the same metropolitan area for that fiscal year, except that—

(A) in determining the amounts awarded to cities or counties for purposes of calculating

shares pursuant to this sentence, there shall be excluded from the award of any city or county any amounts which become available as a result of actions against such city or county under section 5311 of this title;

(B) in reallocating amounts resulting from an action under section 5304(e) of this title or section 5311 of this title, a city or county against whom any such action was taken in a fiscal year shall be excluded from a calculation of share for purposes of reallocating, in the succeeding year, the amounts becoming available as a result of such action; and

(C) in no event may the share of reallocated funds for any metropolitan city or urban county exceed 25 per centum of the amount awarded to the city or county under subsection (b) of this section for the fiscal year in which the reallocated funds under this paragraph become available.

Any amounts allocated under subsection (b) of this section which become available for reallocation and for which no metropolitan city or urban county qualifies under this paragraph shall be added to amounts available for allocation under such subsection (b) of this section in the succeeding fiscal year.

(2) Notwithstanding any other provision of this chapter, the Secretary shall make grants from amounts authorized for use under subsection (b) of this section by the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1981, in accordance with the provisions of this chapter which governed grants with respect to such amounts, as such provisions existed prior to October 1, 1981, except that any such amounts which are not obligated before January 1, 1982, shall be reallocated in accordance with paragraph (1).

(3) Notwithstanding the provisions of paragraph (1), the Secretary may upon request transfer responsibility to any metropolitan city for the administration of any amounts received, but not obligated, by the urban county in which such city is located if (A) such city was an included unit of general local government in such county prior to the qualification of such city as a metropolitan city; (B) such amounts were designated and received by such county for use in such city prior to the qualification of such city as a metropolitan city; and (C) such city and county agree to such transfer of responsibility for the administration of such amounts.

(4)(A) Notwithstanding paragraph (1), in the event of a major disaster declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. 5121 et seq.], the Secretary shall make available, to metropolitan cities and urban counties located or partially located in the areas affected by the disaster, any amounts that become available as a result of actions under section 5304(e) or 5311 of this title.

(B) In using any amounts that become available as a result of actions under section 5304(e) or 5311 of this title, the Secretary shall give priority to providing emergency assistance under this paragraph.

(C) The Secretary may provide assistance to any metropolitan city or urban county under this paragraph only to the extent necessary to

meet emergency community development needs, as the Secretary shall determine (subject to subparagraph (D)), of the city or county resulting from the disaster that are not met with amounts otherwise provided under this chapter, the Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. 5121 et seq.], and other sources of assistance.

(D) Amounts provided to metropolitan cities and urban counties under this paragraph may be used only for eligible activities under section 5305 of this title, and in implementing this section, the Secretary shall evaluate the natural hazards to which any permanent replacement housing is exposed and shall take appropriate action to mitigate such hazards.

(E) The Secretary shall provide for applications (or amended applications and statements under section 5304 of this title) for assistance under this paragraph.

(F) A metropolitan city or urban county eligible for assistance under this paragraph may receive such assistance only in each of the fiscal years ending during the 3-year period beginning on the date of the declaration of the disaster by the President.

(G) This paragraph may not be construed to require the Secretary to reserve any amounts that become available as a result of actions under section 5304(e) or 5311 of this title for assistance under this paragraph if, when such amounts are to be reallocated under paragraph (1), no metropolitan city or urban county qualifies for assistance under this paragraph.

(d) Allocation among States for nonentitlement areas; amount and calculation of grants; distributions by State or Secretary; certain distributions made pursuant to prior provisions; certifications required by Governor enumerated; responsibility for administration and administrative expenses; reallocation; certifications required of units of general local government in nonentitlement areas; applicability of this chapter and other law

(1) Of the amount approved in an appropriation Act under section 5303 of this title that remains after allocations pursuant to paragraphs (1), (2), and (3) of subsection (a) of this section, 30 per centum shall be allocated among the States for use in nonentitlement areas. The allocation for each State shall be the greater of an amount that bears the same ratio to the allocation for such areas of all States available under this subparagraph as either—

(A) the average of the ratios between—

(i) the population of the nonentitlement areas in that State and the population of the nonentitlement areas of all States;

(ii) the extent of poverty in the nonentitlement areas in that State and the extent of poverty in the nonentitlement areas of all States; and

(iii) the extent of housing overcrowding in the nonentitlement areas in that State and the extent of housing overcrowding in the nonentitlement areas of all States; or

(B) the average of the ratios between—

(i) the age of housing in the nonentitlement areas in that State and the age of

housing in the nonentitlement areas of all States;

(ii) the extent of poverty in the nonentitlement areas in that State and the extent of poverty in the nonentitlement areas of all States; and

(iii) the population of the nonentitlement areas in that State and the population of the nonentitlement areas of all States.

In determining the average of the ratios under subparagraph (A) the ratio involving the extent of poverty shall be counted twice and each of the other ratios shall be counted once; and in determining the average of the ratios under subparagraph (B), the ratio involving the age of housing shall be counted two and one-half times, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving population shall be counted once. The Secretary shall, in order to compensate for the discrepancy between the total of the amounts to be allocated under this paragraph and the total of the amounts available under such paragraph, make a pro rata reduction of each amount allocated to the nonentitlement areas in each State under such paragraph so that the nonentitlement areas in each State will receive an amount which represents the same percentage of the total amount available under such paragraph as the percentage which the nonentitlement areas of the same State would have received under such paragraph if the total amount available under such paragraph had equaled the total amount which was allocated under such paragraph.

(2)(A) Amounts allocated under paragraph (1) shall be distributed to units of general local government located in nonentitlement areas of the State to carry out activities in accordance with the provisions of this chapter—

(i) by a State that has elected, in such manner and at such time as the Secretary shall prescribe, to distribute such amounts, consistent with the statement submitted under section 5304(a) of this title; or

(ii) by the Secretary, in any case described in subparagraph (B), for use by units of general local government in accordance with paragraph (3)(B).

Any election to distribute funds made after the close of fiscal year 1984 is permanent and final. Notwithstanding any provision of this chapter, the Secretary shall make grants from amounts authorized for use in nonentitlement areas by the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1981, in accordance with the provisions of this chapter which governed grants with respect to such amounts, as such provisions existed prior to October 1, 1981. Any amounts under the preceding sentence (except amounts for which preapplications have been approved by the Secretary prior to October 1, 1981, and which have been obligated by January 1, 1982) which are or become available for obligation after fiscal year 1981 shall be available for distribution in the State in which the grants from such amounts were made, by the State or by the Secretary, whichever is distributing the State allocation in the fiscal year in which such amounts are or become available.

(B) The Secretary shall distribute amounts allocated under paragraph (1) if the State has not elected to distribute such amounts.

(C) To receive and distribute amounts allocated under paragraph (1), the State must certify that it, with respect to units of general local government in nonentitlement areas—

(i) engages or will engage in planning for community development activities;

(ii) provides or will provide technical assistance to units of general local government in connection with community development programs;

(iii) will not refuse to distribute such amounts to any unit of general local government on the basis of the particular eligible activity selected by such unit of general local government to meet its community development needs, except that this clause may not be considered to prevent a State from establishing priorities in distributing such amounts on the basis of the activities selected; and

(iv) has consulted with local elected officials from among units of general local government located in nonentitlement areas of that State in determining the method of distribution of funds required by subparagraph (A).

(D) To receive and distribute amounts allocated under paragraph (1), the State shall certify that each unit of general local government to be distributed funds will be required to identify its community development and housing needs, including the needs of low and moderate income persons, and the activities to be undertaken to meet such needs.

(3)(A) If the State receives and distributes such amounts, it shall be responsible for the administration of funds so distributed. The State shall pay from its own resources all administrative expenses incurred by the State in carrying out its responsibilities under this chapter or section 1437o(e)(1)¹ of this title, except that from the amounts received for distribution in nonentitlement areas, the State may deduct an amount to cover such expenses and its administrative expenses under section 1706e¹ of title 12 not to exceed the sum of \$100,000 plus 50 percent of any such expenses under this chapter in excess of \$100,000. Amounts deducted in excess of \$100,000 shall not, subject to paragraph (6), exceed 3 percent of the amount so received.

(B) If the Secretary distributes such amounts, the distribution shall be made in accordance with determinations of the Secretary pursuant to statements submitted and the other requirements of section 5304 of this title (other than subsection (c)) and in accordance with regulations and procedures prescribed by the Secretary.

(C) Any amounts allocated for use in a State under paragraph (1) that are not received by the State for any fiscal year because of failure to meet the requirements of subsection (a), (b), or (d) of section 5304 of this title or to make the certifications required in subparagraphs (C) and (D) of paragraph (2), or that become available as a result of actions against the State under section 5304(e) or 5311 of this title, shall be added to

amounts allocated to all States under paragraph (1) for the succeeding fiscal year.

(D) Any amounts allocated for use in a State under paragraph (1) that become available as a result of actions under section 5304(e) or 5311 of this title against units of general local government in nonentitlement areas of the State or as a result of the closeout of a grant made by the Secretary under this section in nonentitlement areas of the State shall be added to amounts allocated to the State under paragraph (1) for the fiscal year in which the amounts become so available.

(4) Any combination of units of general local governments may not be required to obtain recognition by the Secretary pursuant to section 5302(a)(1) of this title to be treated as a single unit of general local government for purposes of this subsection.

(5) From the amounts received under paragraph (1) for distribution in nonentitlement areas, the State may deduct an amount, subject to paragraph (6), not to exceed 3 percent of the amount so received, to provide technical assistance to local governments and nonprofit program recipients.

(6) Of the amounts received under paragraph (1), the State may deduct not more than an aggregate total of 3 percent of such amounts for—

(A) administrative expenses under paragraph (3)(A); and

(B) technical assistance under paragraph (5).

(7) No amount may be distributed by any State or the Secretary under this subsection to any unit of general local government located in a nonentitlement area unless such unit of general local government certifies that—

(A) it will minimize displacement of persons as a result of activities assisted with such amounts;

(B) its program will be conducted and administered in conformity with the Civil Rights Act of 1964 [42 U.S.C. 2000a et seq.] and the Fair Housing Act [42 U.S.C. 3601 et seq.], and that it will affirmatively further fair housing;

(C) it will provide for opportunities for citizen participation, hearings, and access to information with respect to its community development program that are comparable to those required of grantees under section 5304(a)(2) of this title; and

(D) it will not attempt to recover any capital costs of public improvements assisted in whole or part under this section or with amounts resulting from a guarantee under section 5308 of this title by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements, unless (i) funds received under this section are used to pay the proportion of such fee or assessment that relates to the capital costs of such public improvements that are financed from revenue sources other than under this chapter; or (ii) for purposes of assessing any amount against properties owned and occupied by persons of moderate income, the grantee certifies to the Secretary or such State, as the case may be, that it lacks sufficient funds received under this section to comply with the requirements of clause (i).

¹ See References in Text note below.

(8) Any activities conducted with amounts received by a unit of general local government under this subsection shall be subject to the applicable provisions of this chapter and other Federal law in the same manner and to the same extent as activities conducted with amounts received by a unit of general local government under subsection (a) of this section.

(e) Qualification or submission dates, and finality and conclusiveness of computations and determinations

The Secretary may fix such qualification or submission dates as he determines are necessary to permit the computations and determinations required by this section to be made in a timely manner, and all such computations and determinations shall be final and conclusive.

(f) Pro rata adjustment of entitlement amounts

If the total amount available for distribution in any fiscal year to metropolitan cities and urban counties under this section is insufficient to provide the amounts to which metropolitan cities and urban counties would be entitled under subsection (b) of this section, and funds are not otherwise appropriated to meet the deficiency, the Secretary shall meet the deficiency through a pro rata reduction of all amounts determined under subsection (b) of this section. If the total amount available for distribution in any fiscal year to metropolitan cities and urban counties under this section exceeds the amounts to which metropolitan cities and urban counties would be entitled under subsection (b) of this section, the Secretary shall distribute the excess through a pro rata increase of all amounts determined under subsection (b) of this section.

Notes or other obligations guaranteed pursuant to this section shall be in such form and denominations, have such maturities, and be subject to such conditions as may be prescribed by regulations issued by the Secretary. The Secretary may not deny a guarantee under this section on the basis of the proposed repayment period for the note or other obligation, unless the period is more than 20 years or the Secretary determines that the period causes the guarantee to constitute an unacceptable financial risk. Notwithstanding any other provision of law and subject only to the absence of qualified applicants or proposed activities and to the authority provided in this section, to the extent approved or provided in appropriation Acts, the Secretary shall enter into commitments to guarantee notes and obligations under this section with an aggregate principal amount of \$2,000,000,000 for fiscal year 1993 and \$2,000,000,000 for fiscal year 1994. (b) Prerequisites

No guarantee or commitment to guarantee shall be made with respect to any note or other obligation if the issuer's total outstanding notes or obligations guaranteed under this section (excluding any amount defeased under the contract entered into under subsection (d)(1)(A) of this section) would thereby exceed an amount equal to 5 times the amount of the grant approval for the issuer pursuant to section 5306 or 5307 of this title.

(c) Payment of principal, interest and costs

Notwithstanding any other provision of this chapter, grants allocated to an issuer pursuant to this chapter (including program income derived therefrom) are authorized for use in the payment of principal and interest due (including such servicing, underwriting, or other costs as may be specified in regulations of the Secretary) on the notes or other obligations guaranteed pursuant to this section.

(d) Repayment contract; security; pledge by State

(1) To assure the repayment of notes or other obligations and charges incurred under this sec-

tion and as a condition for receiving such guarantees, the Secretary shall require the issuer to—

(B) pledge any grant for which the issuer may become eligible under this chapter; and

(C) furnish, at the discretion of the Secretary, such other security as may be deemed appropriate by the Secretary in making such guarantees, including increments in local tax receipts generated by the activities assisted under this chapter or dispositions proceeds from the sale of land or rehabilitated property.

The Secretary shall issue regulations establishing criteria in accordance with the preceding sentence and setting forth minimum standards for determining the level of economic distress of cities and urban counties for eligibility for such grants. These standards shall take into account factors such as the age of housing; the extent of poverty; the extent of population lag; growth of per capita income; and the extent of unemployment, job lag, or surplus labor. Any city that has a population of less than 50,000 persons and is not the central city of a metropolitan area, and that was eligible for fiscal year 1983 under this paragraph for assistance under this section, shall continue to be eligible for such assistance until the Secretary revises the standards for eligibility for such cities under this paragraph and includes the extent of unemployment, job lag, or labor surplus as a standard of distress for such cities. The Secretary shall make such revision as soon as practicable following November 30, 1983.

(2) A city or urban county which fails to meet the minimum standards established pursuant to paragraph (1) shall be eligible for assistance under this section if it meets the requirements of the first sentence of such paragraph and—

(A) in the case of a city with a population of fifty thousand persons or more or an urban county, contains an area (i) composed of one or more contiguous census tracts, enumeration districts, neighborhood statistics areas,

or block groups, as defined by the United States Bureau of the Census, having at least a population of ten thousand persons or 10 per centum of the population of the city or urban county; (ii) in which at least 70 per centum of the residents have incomes below 80 per centum of the median income of the city or urban county; and (iii) in which at least 30 per centum of the residents have incomes below the national poverty level; or

(B) in the case of a city with a population of less than fifty thousand persons, contains an area (i) composed of one or more contiguous census tracts, enumeration districts, neighborhood statistics areas, or block groups or other areas defined by the United States Bureau of the Census or for which data certified by the United States Bureau of the Census are available having at least a population of two thousand five hundred persons or 10 per centum of the population of the city, whichever is greater; (ii) in which at least 70 per centum of the residents have incomes below 80 per centum of the median income of the city; and (iii) in which at least 30 per centum of the residents have incomes below the national poverty level.

The Secretary shall use up to, but not more than, 20 per centum of the funds appropriated for use in any fiscal year under this section for the purpose of making grants to cities and urban counties eligible under this paragraph.

(c) Applications; documentation of eligibility; proposed plan; assurance of notice and comment; assurance of consideration on historical landmarks

Applications for assistance under this section shall—

(1) in the case of an application for a grant under subsection (b)(2) of this section, include documentation of grant eligibility in accordance with the standards described in that subsection;

(2) set forth the activities for which assistance is sought, including (A) an estimate of the costs and general location of the activities; (B) a summary of the public and private resources which are expected to be made available in connection with the activities, including how the activities will take advantage of unique opportunities to attract private investment; and (C) an analysis of the economic benefits which the activities are expected to produce;

(3) contain a certification satisfactory to the Secretary that the applicant, prior to submission of its application, (A) has held public hearings to obtain the views of citizens, particularly residents of the area in which the proposed activities are to be carried out; (B) has analyzed the impact of these proposed activities on the residents, particularly those of low and moderate income, of the residential neighborhood, and on the neighborhood in which they are to be carried out; and (C) has made available the analysis described in clause (B) to any interested person or organization residing or located in the neighborhood in which the proposed activities are to be carried out; and

(4) contain a certification satisfactory to the Secretary that the applicant, prior to submission of its application, (A) has identified all properties, if any, which are included on the National Register of Historic Places and which, as determined by the applicant, will be affected by the project for which the application is made; (B) has identified all other properties, if any, which will be affected by such project and which, as determined by the applicant, may meet the criteria established by the Secretary of the Interior for inclusion on such Register, together with documentation relating to the inclusion of such properties on the Register; (C) has determined the effect, as determined by the applicant, of the project on the properties identified pursuant to clauses (A) and (B); and (D) will comply with the requirements of section 5320 of this title.

(d) Mandatory selection criteria; award of points; distribution of funds; number of competitions per year; use of distress conditions data by urban counties

(1) Except in the case of a city or urban county eligible under subsection (b)(2) of this section, the Secretary shall establish selection criteria for a national competition for grants under this section which must include—

(A) the comparative degree of economic distress among applicants, as measured (in the case of a metropolitan city or urban county) by the differences in the extent of growth lag, the extent of poverty, and the adjusted age of housing in the metropolitan city or urban county;

(B) other factors determined to be relevant by the Secretary in assessing the comparative degree of economic deterioration in cities and urban counties;

(C) the following other criteria:

(i) the extent to which the grant will stimulate economic recovery by leveraging private investment;

(ii) the number of permanent jobs to be created and their relation to the amount of grant funds requested;

(iii) the proportion of permanent jobs accessible to lower income persons and minorities, including persons who are unemployed;

(iv) the extent to which the project will retain jobs that will be lost without the provision of a grant under this section;

(v) the extent to which the project will relieve the most pressing employment or residential needs of the applicant by—

(I) reemploying workers in a skill that has recently suffered a sharp increase in unemployment locally;

(II) retraining recently unemployed residents in new skills;

(III) providing training to increase the local pool of skilled labor; or

(IV) producing decent housing for low- and moderate-income persons in cases where such housing is in severe shortage in the area of the applicant, except that an application shall be considered to produce housing for low- and moderate-income persons under this clause only if such application proposes that (a) not less than 51 per-

cent of all funds available for the project shall be used for dwelling units and related facilities; and (b) not less than 30 percent of all funds used for dwelling units and related facilities shall be used for dwelling units to be occupied by persons of low and moderate income, or not less than 20 percent of all dwelling units made available to occupancy using such funds shall be occupied by persons of low and moderate income, whichever results in the occupancy of more dwelling units by persons of low and moderate income;

(vi) the impact of the proposed activities on the fiscal base of the city or urban county and its relation to the amount of grant funds requested;

(vii) the extent to which State or local Government¹ funding or special economic incentives have been committed; and

(viii) the extent to which the project will have a substantial impact on physical and economic development of the city or urban county, the proposed activities are likely to be accomplished in a timely fashion with the grant amount available, and the city or urban county has demonstrated performance in housing and community development programs; and

(D) additional consideration for projects with the following characteristics:

(i) projects to be located within a city or urban county which did not receive a preliminary grant approval under this section during the 12-month period preceding the date on which applications are required to be submitted for the grant competition involved; and

(ii) twice the amount of the additional consideration provided under clause (i) for projects to be located in cities or urban counties which did not receive a preliminary grant approval during the 24-month period preceding the date on which applications under this section are required to be submitted for the grant competition involved.

If a city or urban county has submitted and has pending more than one application, the additional consideration provided by subparagraph (D) of the preceding sentence shall be available only to the project in such city or urban county which received the highest number of points under subparagraph (C) of such sentence.

(2) For the purpose of making grants with respect to areas described in subsection (b)(2) of this section, the Secretary shall establish selection criteria, which must include (A) factors determined to be relevant by the Secretary in assessing the comparative degree of economic deterioration among eligible areas, and (B) such other criteria as the Secretary may determine, including at a minimum the criteria listed in paragraph (1)(C) of this subsection.

(3) The Secretary shall award points to each application as follows:

(A) not more than 35 points on the basis of the criteria referred to in paragraph (1)(A);

¹ So in original. Probably should not be capitalized.

(B) not more than 35 points on the basis of the criteria referred to in paragraph (1)(B);

(C) not more than 33 points on the basis of the criteria referred to in paragraph (1)(C); and

(D)(i) 1 additional point on the basis of the criterion referred to in paragraph (1)(D)(i); or
(ii) 2 additional points on the basis of the criterion referred to in paragraph (1)(D)(ii).

(4) The Secretary shall distribute grant funds under this section so that to the extent practicable during each funding cycle—

(A) 65 percent of the funds is first made available utilizing all of the criteria set forth in paragraph (1); and

(B) 35 percent of the funds is then made available solely on the basis of the factors referred to in subparagraphs (C) and (D) of paragraph (1).

(5)(A) Within 30 days of the start of each fiscal year, the Secretary shall announce the number of competitions for grants to be held in that fiscal year. The number of competitions shall be not less than two nor more than three.

(B) Each competition for grants described in any clause of subparagraph (A) shall be for an amount equal to the sum of—

(i) approximately the amount of the funds available for such grants for the fiscal year divided by the number of competitions for those funds;

(ii) any funds available for such grants in any previous competition that are not awarded; and

(iii) any funds available for such grants in any previous competition that are recaptured.

(C) Notwithstanding any other provision of this section, in each competition for grants under this section, no city or urban county may be awarded a grant or grants in an amount in excess of \$10,000,000 until all cities and urban counties which submitted fundable applications have been awarded a grant. If funds are available for additional grants after each city and urban county submitting a fundable application is awarded one or more grants under the preceding sentence, then additional grants shall be made so that each city or urban county that has submitted multiple applications is awarded one additional grant in order of ranking, with no single city or urban county receiving more than one grant approval in any subsequent series of grant determinations within the same competition.

(D) All grants under this section, including grants to cities and urban counties described in subsection (b)(2) of this section, shall be awarded in accordance with subparagraph (C) so that all grants under this section are made in order of ranking.

(e) Limitations on power of Secretary to approve grants; waiver

The Secretary may not approve any grant to a city or urban county eligible under subsection (b)(2) of this section unless—

(1) the grant will be used in connection with a project located in an area described in subsection (b)(2) of this section, except that the Secretary may waive this requirement where the Secretary determines (A) that there is no

suitable site for the project within that area, (B) the project will be located directly adjacent to that area, and (C) the project will contribute substantially to the economic development of that area;

(2) the city or urban county has demonstrated to the satisfaction of the Secretary that basic services supplied by the city or urban county to the area described in subsection (b)(2) of this section are at least equivalent, as measured by per capita expenditures, to those supplied to other areas within the city or urban county which are similar in population size and physical characteristics and which have median incomes above the median income for the city or urban county;

(3) the grant will be used in connection with a project which will directly benefit the low- and moderate-income families and individuals residing in the area described in subsection (b)(2) of this section; and

(4) the city or urban county makes available, from its own funds or from funds received from the State or under any Federal program which permits the use of financial assistance to meet the non-Federal share requirements of Federal grant-in-aid programs, an amount equal to 20 per centum of the grant to be available under this section to be used in carrying out the activities described in the application.

(f) Permissibility of consistent but unenumerated activities; report on use of repaid grant funds for economic development activities

Activities assisted under this section may include such activities, in addition to those authorized under section 5305(a) of this title, as the Secretary determines to be consistent with the purposes of this section. In any case in which the project proposes the repayment to the applicant of the grant funds, such funds shall be made available by the applicant for economic development activities that are eligible activities under this section or section 5305 of this title. The applicant shall annually provide the Secretary with a statement of the projected receipt and use of repaid grant funds during the next year together with a report acceptable to the Secretary on the use of such funds during the most recent preceding full fiscal year of the applicant.

(g) Annual review and audit; adjustments, withdrawals and reduction permitted

The Secretary shall, at least on an annual basis, make reviews and audits of recipients of grants under this section as necessary to determine the progress made in carrying out activities substantially in accordance with approved plans and timetables. The Secretary may adjust, reduce, or withdraw grant funds, or take other action as appropriate in accordance with the findings of these reviews and audits, except that funds already expended on eligible activities under this chapter shall not be recaptured or deducted from future grants made to the recipient.

(h) Limitations on grants for industrial or commercial relocations or expansions; appeal of denial or cancellation of assistance; grants to adversely affected individuals

(1) Speculative projects

No assistance may be provided under this section for projects intended to facilitate the relocation of industrial or commercial plants or facilities from one area to another, unless the Secretary finds that the relocation does not significantly and adversely affect the unemployment or economic base of the area from which the industrial or commercial plant or facility is to be relocated. The provisions of this paragraph shall apply only to projects that do not have identified intended occupants.

(2) Projects with identified intended occupants

No assistance may be provided or utilized under this section for any project with identified intended occupants that is likely to facilitate—

(A) a relocation of any operation of an industrial or commercial plant or facility or other business establishment—

(i) from any city, urban county, or identifiable community described in subsection (p) of this section, that is eligible for assistance under this section; and

(ii) to the city, urban county, or identifiable community described in subsection (p) of this section, in which the project is located; or

(B) an expansion of any such operation that results in a reduction of any such operation in any city, county, or community described in subparagraph (A)(i).

(3) Significant and adverse effect

The restrictions established in paragraph (2) shall not apply if the Secretary determines that the relocation or expansion does not significantly and adversely affect the employment or economic base of the city, county, or community from which the relocation or expansion occurs.

(4) Appeal of adverse determination

Following notice of intent to withhold, deny, or cancel assistance under paragraph (1) or (2), the Secretary shall provide a period of not less than 90 days in which the applicant can appeal to the Secretary the withholding, denial, or cancellation of assistance. Notwithstanding any other provision of this section, nothing in this section or in any legislative history related to the enactment of this section may be construed to permit an inference or conclusion that the policy of the Congress in the urban development action grant program is to facilitate the relocation of businesses from one area to another.

(5) Assistance for individuals adversely affected by prohibited relocations

(A) Any amount withdrawn by, recaptured by, or paid to the Secretary due to a violation (or a settlement of an alleged violation) of this subsection (or of any regulation issued or contractual provision entered into to carry out

this subsection) by a project with identified intended occupants shall be made available by the Secretary as a grant to the city, county, or community described in subsection (p) of this section, from which the operation of an industrial or commercial plant or facility or other business establishment relocated or in which the operation was reduced.

(B)(i) Any amount made available under this paragraph shall be used by the grantee to assist individuals who were employed by the operation involved prior to the relocation or reduction and whose employment or terms of employment were adversely affected by the relocation or reduction. The assistance shall include job training, job retraining, and job placement.

(ii) If any amount made available to a grantee under this paragraph is more than is required to provide assistance under clause (i), the grantee shall use the excess amount to carry out community development activities eligible under section 5305(a) of this title.

(C)(i) The provisions of this paragraph shall be applicable to any amount withdrawn by, recaptured by, or paid to the Secretary under this section, including any amount withdrawn, recaptured, or paid before the effective date of this paragraph.

(ii) Grants may be made under this paragraph only to the extent of amounts provided in appropriation Acts.

(6) Definition

For purposes of this subsection, the term “operation” includes any plant, equipment, facility, position, employment opportunity, production capacity, or product line.

(7) Regulations

Not later than 60 days after February 5, 1988, the Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection. Such regulations shall include specific criteria to be used by the Secretary in determining whether there is a significant and adverse effect under paragraph (3).

(i) Minimum percentage of funds to be allocated to certain noncentral cities; application by consortia of cities of less than 50,000 population

Not less than 25 per centum of the funds made available for grants under this section shall be used for cities with populations of less than fifty thousand persons which are not central cities of a metropolitan statistical area. The Secretary shall encourage cooperation by geographically proximate cities of less than 50,000 population by permitting consortia of such cities, which may also include county governments that are not urban counties, to apply for grants on behalf of a city that is otherwise eligible for assistance under this section. Any grants awarded to such consortia shall be administered in compliance with eligibility requirements applicable to individual cities.

(j) Grant contingent on factors related to non-Federal funds

A grant may be made under this section only where the Secretary determines that there is a

strong probability that (1) the non-Federal investment in the project would not be made without the grant, and (2) the grant would not substitute for non-Federal funds which are otherwise available to the project.

(k) Duty of Secretary to minimize amount

In making grants under this section, the Secretary shall take such steps as the Secretary deems appropriate to assure that the amount of the grant provided is the least necessary to make the project feasible.

(l) Power of Secretary to waive requirement that town or township be closely settled

For purposes of this section, the Secretary may reduce or waive the requirement in section 5302(a)(5)(B)(ii) of this title that a town or township be closely settled.

(m) Notice to State historic preservation officer and Secretary of the Interior required with regard to affected landmark property; opportunity for comment

In the case of any application which identifies any property in accordance with subsection (c)(4)(B) of this section, the Secretary may not commit funds with respect to an approved application unless the applicant has certified to the Secretary that the appropriate State historic preservation officer and the Secretary of the Interior have been provided an opportunity to take action in accordance with the provisions of section 5320(b) of this title.

(n) Territories, tribes, and certain Hawaiian counties included in term "city"

(1) For the purposes of this section, the term "city" includes Guam, American Samoa, the Northern Mariana Islands, the Virgin Islands, and Indian tribes. Such term also includes the counties of Kauai, Maui and Hawaii in the State of Hawaii.

(2) The Secretary may not approve a grant to an Indian tribe under this section unless the tribe (A) is located on a reservation, or on former Indian reservations in Oklahoma as determined by the Secretary of the Interior, or in an Alaskan Native Village, and (B) was an eligible recipient under chapter 67 of title 31 prior to the repeal of such chapter.

(o) Special provisions for years after 1983

If no amounts are set aside under, or amounts are precluded from being appropriated for this section for fiscal years after fiscal year 1983, any amount which is or becomes available for use under this section after fiscal year 1983 shall be added to amounts appropriated under section 5303 of this title, except that amounts available to the Secretary for use under this subsection as of October 1, 1993, and amounts released to the Secretary pursuant to subsection (t) of this section may be used to provide grants under section 5308(q) of this title.²

(p) Unincorporated portions of urban counties

An unincorporated portion of an urban county that is approved by the Secretary as an identifiable community for purposes of this section is eligible for a grant under subsection (b)(2) of

this section if such portion meets the eligibility requirements contained in the first sentence of subsection (b)(1) of this section and the requirements of subsection (b)(2)(B) of this section (applied to the population of the portion of the urban county) and if it otherwise complies with the provisions of this section.

(q) Technical assistance grants

Of the amounts appropriated for purposes of this section for any fiscal year, not more than \$2,500,000 may be used by the Secretary to make technical assistance grants to States or their agencies, municipal technical advisory services operated by universities, or State associations of counties or municipalities, to enable such entities to assist units of general local government described in subsection (i) of this section in developing, applying for assistance for, and implementing programs eligible for assistance under this section.

(r) Nondiscrimination by Secretary against type of activity or applicant

In utilizing the discretion of the Secretary when providing assistance and applying selection criteria under this section, the Secretary may not discriminate against applications on the basis of (1) the type of activity involved, whether such activity is primarily housing, industrial, or commercial; or (2) the type of applicant, whether such applicant is a city or urban county.

(s) Maximum grant amount for fiscal years 1988 and 1989

For fiscal years 1988 and 1989, the maximum grant amount for any project under this section is \$10,000,000.

(t) UDAG retention program

If a grant or a portion of a grant under this section remains unexpended upon the issuance of a notice implementing this subsection, the grantee may enter into an agreement, as provided under this subsection, with the Secretary to receive a percentage of the grant amount and relinquish all claims to the balance of the grant within 90 days of the issuance of notice implementing this subsection (or such later date as the Secretary may approve). The Secretary shall not recapture any funds obligated pursuant to this section during a period beginning on April 11, 1994, until 90 days after the issuance of a notice implementing this subsection. A grantee may receive as a grant under this subsection—

(1) 33 percent of such unexpended amounts if—

(A) the grantee agrees to expend not less than one-half of the amount received for activities authorized pursuant to section 5308(q) of this title and to expend such funds in conjunction with a loan guarantee made under section 5308 of this title at least equal to twice the amount of the funds received; and

(B)(i) the remainder of the amount received is used for economic development activities eligible under this chapter; and

(ii) except when waived by the Secretary in the case of a severely distressed jurisdiction, not more than one-half of the costs of

² So in original.

activities under subparagraph (B) are derived from such unexpended amounts; or

(2) 25 percent of such unexpended amounts if—

(A) the grantee agrees to expend such funds for economic development activities eligible under this chapter; and

(B) except when waived by the Secretary in the case of a severely distressed jurisdiction, not more than one-half of the costs of such activities are derived from such unexpended amount.

(2) The Secretary shall accept applications from eligible neighborhood development organizations for participation in the program. Eligible organizations may participate in more than one year of the program, but shall be required to submit a new application and to compete in the selection process for each program year. (4) For purposes of paragraph (2), the Secretary shall, for each participating organization, determine an appropriate ratio by which monetary contributions made to participating neighborhood development organizations will be matched by Federal funds. The highest such ratios shall be established for neighborhoods having the smallest number of households or the greatest degree of economic distress.

(5) The Secretary shall insure that—

(A) grants and other forms of assistance may be made available under this section only if the application contains a certification by the unit of general local government within which the neighborhood to be assisted is located that such assistance is not inconsistent with the comprehensive housing affordability strategy of such unit approved under section 12705 of this title or the statement of community development activities and community development plans of the unit submitted under section 5304(m) of this title, except that the failure of a unit of general local government to respond to a request for a certification within thirty days after the request is made shall be deemed to be a certification; and

(c) Effective date of orders establishing standards

Each order establishing a Federal manufactured home construction and safety standard shall specify the date such standard is to take effect, which shall not be sooner than one hundred and eighty days or later than one year after the date such order is issued, unless the Secretary finds, for good cause shown, that an earlier or later effective date is in the public interest, and publishes his reasons for such finding.

(d) Supremacy of Federal standards

Whenever a Federal manufactured home construction and safety standard established under this chapter is in effect, no State or political subdivision of a State shall have any authority either to establish, or to continue in effect, with respect to any manufactured home covered, any standard regarding the construction or safety applicable to the same aspect of performance of such manufactured home which is not identical to the Federal manufactured home construction and safety standard. Federal preemption under this subsection shall be broadly and liberally construed to ensure that disparate State or local requirements or standards do not affect the uniformity and comprehensiveness of the standards promulgated under this section nor the Federal superintendence of the manufactured housing industry as established by this chapter. Subject to section 5404 of this title, there is reserved to each State the right to establish standards for the stabilizing and support systems of manufactured homes sited within that State, and for the foundations on which manufactured homes sited within that State are installed, and the right to enforce compliance with such standards, except that such standards shall be consistent with the purposes of this chapter and shall be consistent with the design of the manufacturer.

(e) Considerations in establishing and interpreting standards and regulations

The consensus committee, in recommending standards, regulations, and interpretations, and the Secretary, in establishing standards or regulations or issuing interpretations under this section, shall—

(1) consider relevant available manufactured home construction and safety data, including the results of the research, development, testing, and evaluation activities conducted pursuant to this chapter, and those activities conducted by private organizations and other gov-

ernmental agencies to determine how to best protect the public;

(2) consult with such State or interstate agencies (including legislative committees) as he deems appropriate;

(3) consider whether any such proposed standard is reasonable for the particular type of manufactured home or for the geographic region for which it is prescribed;

(4) consider the probable effect of such standard on the cost of the manufactured home to the public; and

(5) consider the extent to which any such standard will contribute to carrying out the purposes of this chapter.

(f) Coverage; exclusion

The Secretary shall exclude from the coverage of this chapter any structure which the manufacturer certifies, in a form prescribed by the Secretary, to be:

(1) designed only for erection or installation on a site-built permanent foundation;

(2) not designed to be moved once so erected or installed;

(3) designed and manufactured to comply with a nationally recognized model building code or an equivalent local code, or with a State or local modular building code recognized as generally equivalent to building codes for site-built housing, or with minimum property standards adopted by the Secretary pursuant to title II of the National Housing Act [12 U.S.C. 1707 et seq.]; and

(4) to the manufacturer's knowledge is not intended to be used other than on a site-built permanent foundation.

(g) Manufactured housing construction and safety standards

(1) The Federal manufactured home construction and safety standards established by the Secretary under this section shall include preemptive energy conservation standards in accordance with this subsection.

(2) The energy conservation standards established under this subsection shall be cost-effective energy conservation performance standards designed to ensure the lowest total of construction and operating costs.

(3) The energy conservation standards established under this subsection shall take into consideration the design and factory construction techniques of manufactured homes and shall provide for alternative practices that result in net estimated energy consumption equal to or less than the specified standards.

(h) New performance standards for hardboard siding

The Secretary shall develop a new standard for hardboard panel siding on manufactured housing taking into account durability, longevity, consumer's costs for maintenance and any other relevant information pursuant to subsection (e) of this section. The Secretary shall consult with the National Manufactured Home Advisory Council and the National Commission on Manufactured Housing in establishing the new standard. The new performance standard developed shall ensure the durability of hardboard sidings for at least a normal life of a

mortgage with minimum maintenance required. Not later than 180 days from October 28, 1992, the Secretary shall update the standards for hardboard siding.

§ 5404. Manufactured home installation

(a) Provision of installation design and instructions

A manufacturer shall provide with each manufactured home, design and instructions for the installation of the manufactured home that have been approved by a design approval primary inspection agency. After establishment of model standards under subsection (b)(2) of this section, a design approval primary inspection agency may not give such approval unless a design and instruction provides equal or greater protection than the protection provided under such model standards.

(b) Model manufactured home installation standards

(1) Proposed model standards

Not later than 18 months after the date on which the initial appointments of all the members of the consensus committee are completed, the consensus committee shall develop and submit to the Secretary proposed model manufactured home installation standards,

which shall, to the maximum extent practicable, taking into account the factors described in section 5403(e) of this title, be consistent with—

(A) the manufactured home designs that have been approved by a design approval primary inspection agency; and

(B) the designs and instructions for the installation of manufactured homes provided by manufacturers under subsection (a) of this section.

(2) Establishment of model standards

Not later than 12 months after receiving the proposed model standards submitted under paragraph (1), the Secretary shall develop and establish model manufactured home installation standards, which shall, to the maximum extent practicable, taking into account the factors described in section 5403(e) of this title, be consistent with—

(A) the manufactured home designs that have been approved by a design approval primary inspection agency; and

(B) the designs and instructions for the installation of manufactured homes provided by manufacturers under subsection (a) of this section.

(3) Factors for consideration

(A) Consensus committee

In developing the proposed model standards under paragraph (1), the consensus committee shall consider the factors described in section 5403(e) of this title.

(B) Secretary

In developing and establishing the model standards under paragraph (2), the Secretary shall consider the factors described in section 5403(e) of this title.

(4) Issuance

The model manufactured home installation standards shall be issued after notice and an opportunity for public comment in accordance with section 553 of title 5.

(c) Manufactured home installation programs

(1) Protection of manufactured housing residents during initial period

During the 5-year period beginning on December 27, 2000, no State or manufacturer may establish or implement any installation standards that, in the determination of the Secretary, provide less protection to the residents of manufactured homes than the protection provided by the installation standards in effect with respect to the State or manufacturer, as applicable, on December 27, 2000.

(2) Installation standards

(A) Establishment of installation program

Not later than the expiration of the 5-year period described in paragraph (1), the Secretary shall establish an installation program that meets the requirements of paragraph (3) for the enforcement of installation standards in each State described in subparagraph (B) of this paragraph.

(B) Implementation of installation program

Beginning on the expiration of the 5-year period described in paragraph (1), the Sec-

retary shall implement the installation program established under subparagraph (A) in each State that does not have an installation program established by State law that meets the requirements of paragraph (3).

(C) Contracting out of implementation

In carrying out subparagraph (B), the Secretary may contract with an appropriate agent to implement the installation program established under that subparagraph, except that such agent shall not be a person or entity other than a government, nor an affiliate or subsidiary of such a person or entity, that has entered into a contract with the Secretary to implement any other regulatory program under this chapter.

(3) Requirements

An installation program meets the requirements of this paragraph if it is a program regulating the installation of manufactured homes that includes—

(A) installation standards that, in the determination of the Secretary, provide protection to the residents of manufactured homes that equals or exceeds the protection provided to those residents by—

(i) the model manufactured home installation standards established by the Secretary under subsection (b)(2) of this section; or

(ii) the designs and instructions provided by manufacturers under subsection (a) of this section, if the Secretary determines that such designs and instructions provide protection to the residents of manufactured homes that equals or exceeds the protection provided by the model manufactured home installation standards established by the Secretary under subsection (b)(2) of this section;

(B) the training and licensing of manufactured home installers; and

(C) inspection of the installation of manufactured homes.

title, any person who may be adversely affected by such order when it is effective may at any time prior to the sixtieth day after such order is issued file a petition with the United States court of appeals for the circuit wherein such person resides or has his principal place of business, for judicial review of such order. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary or other officer designated by him for that purpose. The Secretary thereupon shall file in the court the record of the proceedings on which the Secretary based his order, as provided in section 2112 of title 28.

(2) If the petitioner applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Secretary, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing, in such manner and upon such terms and conditions as to the court may seem proper. The Secretary may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings, and his recommendation, if any, for the modification or setting aside of his original order, with the return of such additional evidence.

(3) Upon the filing of the petition referred to in paragraph (1) of this subsection, the court shall have jurisdiction to review the order in accordance with the provisions of sections 701 through 706 of title 5, and to grant appropriate relief.

(6) The remedies provided for in this subsection shall be in addition to and not in substitution for any other remedies provided by law.

(b) A certified copy of the transcript of the record and proceedings under this section shall be furnished by the Secretary to any interested party at his request and payment of the costs thereof, and shall be admissible in any criminal, exclusion of imports, or other proceeding arising under or in respect of this chapter, irrespective of whether proceedings with respect to the order have previously been initiated or become final under subsection (a) of this section.

The Secretary shall submit such cost and other information to the consensus committee for evaluation.

(b) Conditions upon availability to public of submitted information

Such information shall be available to the public unless the manufacturer establishes that it contains a trade secret or that disclosure of any portion of such information would put the manufacturer at a substantial competitive disadvantage. Notice of the availability of such information shall be published promptly in the Federal Register. If the Secretary determines that any portion of such information contains a trade secret or that the disclosure of any portion of such information would put the manufacturer at a substantial competitive disadvantage, such portion may be disclosed to the public only in such manner as to preserve the confidentiality of such trade secret or in such combined or summary form so as not to disclose the identity of any individual manufacturer, except that any such information may be disclosed to other officers or employees concerned with carrying out this chapter or when relevant in any proceeding under this chapter. Nothing in this subsection shall authorize the withholding of information by the Secretary or any officer or employee under his control from the duly authorized committees of the Congress.

(c) "Cost information" defined

For purposes of this section, "cost information" means information with respect to alleged cost increases resulting from action by the Secretary, in such a form as to permit the public, the consensus committee, and the Secretary to make an informed judgment on the validity of the manufacturer's statements. Such term includes both the manufacturer's cost and the cost to retail purchasers.

(d) Power of Secretary to obtain or require submission of information under other provisions unaffected

Nothing in this section shall be construed to restrict the authority of the Secretary to obtain or require submission of information under any other provision of this chapter.

The Secretary is authorized to conduct such inspections and investigations as may be necessary to promulgate or enforce Federal manufactured home construction and safety standards established under this chapter or otherwise to carry out his duties under this chapter. He shall furnish the Attorney General and, when appropriate, the Secretary of the Treasury any information obtained indicating noncompliance with such standards for appropriate action.

(b) Designation by Secretary of persons to enter and inspect factories, etc.; presentation of credentials; reasonableness and scope of inspection

(1) For purposes of enforcement of this chapter, persons duly designated by the Secretary, upon presenting appropriate credentials to the owner, operator, or agent in charge, are authorized—

(B) to inspect, at reasonable times and within reasonable limits and in a reasonable manner, any such factory, warehouse, or establishment, and to inspect such books, papers, records, and documents as are set forth in subsection (c) of this section. Each such inspection shall be commenced and completed with reasonable promptness.

(2) The Secretary is authorized to contract with State and local governments and private inspection organizations to carry out his functions under this subsection.

(c) Powers of Secretary

For the purpose of carrying out the provisions of this chapter, the Secretary is authorized—

(1) to hold such hearings, take such testimony, sit and act at such times and places, administer such oaths, and require, by subpoena or otherwise, the attendance and testimony of such witnesses and the production of such books, papers, correspondence, memorandums, contracts, agreements, or other records, as the Secretary or such officer or employee deems advisable. (3) to require, by general or special orders, any person to file, in such form as the Secretary may prescribe, reports or answers in writing to specific questions relating to any function of the Secretary under this chapter.

Such reports and answers shall be made under oath or otherwise, and shall be filed with the Secretary within such reasonable period as the Secretary may prescribe;

(4) to request from any Federal agency any information he deems necessary to carry out his functions under this chapter, and each such agency is authorized and directed to cooperate with the Secretary and to furnish such information upon request made by the Secretary, and the head of any Federal agency is authorized to detail, on a reimbursable basis, any personnel of such agency to assist in carrying out the duties of the Secretary under this chapter; and

(5) to make available to the public any information which may indicate the existence of a defect which relates to manufactured home construction or safety or of the failure of a manufactured home to comply with applicable manufactured home construction and safety standards. The Secretary shall disclose so much of other information obtained under this subsection to the public as he determines will assist in carrying out this chapter; but he shall not (under the authority of this sentence) make available or disclosure to the public any information which contains or relates to a trade secret or any information the disclosure of which would put the person furnishing such information at a substantial competitive disadvantage, unless he determines that it is necessary to carry out the purpose of this chapter.

(d) Refusal to obey subpoena or order of Secretary; order of compliance by district court; failure to obey order of compliance punishable as contempt

Any of the district courts of the United States within the jurisdiction of which an inquiry is carried on may, in the case of contumacy or refusal to obey a subpoena or order of the Secretary issued under paragraph (1) or paragraph (3) of subsection (c) of this section, issue an order requiring compliance therewith; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(e) Submission by manufacturer of building plans for manufactured homes; certification by manufacturer of conformity of building plans to standards

Each manufacturer of manufactured homes shall submit the building plans for every model of such manufactured homes to the Secretary or his designee for the purpose of inspection under this section. The manufacturer must certify that each such building plan meets the Federal construction and safety standards in force at that time before the model involved is produced.

(f) Records, reports and information from manufacturers, distributors and retailers of manufactured homes; inspection and examination of relevant books, papers, records and documents by designated person

Each manufacturer, distributor, and retailer of manufactured homes shall establish and maintain such records, make such reports, and provide such information as the Secretary may reasonably require to enable him to determine

whether such manufacturer, distributor, or retailer has acted or is acting in compliance with this chapter and Federal manufactured home construction and safety standards prescribed pursuant to this chapter and shall, upon request of a person duly designated by the Secretary, permit such person to inspect appropriate books, papers, records, and documents relevant to determining whether such manufacturer, distributor, or retailer has acted or is acting in compliance with this chapter and manufactured home construction and safety standards prescribed pursuant to this chapter.

(g) Performance and technical data from manufacturer; persons required to receive notification of data

Each manufacturer of manufactured homes shall provide to the Secretary such performance data and other technical data related to performance and safety as may be required to carry out the purposes of this chapter. The Secretary is authorized to require the manufacturer to give notification of such performance and technical data to—

(1) each prospective purchaser of a manufactured home before its first sale for purposes other than resale, at each location where any such manufacturer's manufactured homes are offered for sale by a person with whom such manufacturer has a contractual, proprietary, or other legal relationship and in a manner determined by the Secretary to be appropriate, which may include, but is not limited to, printed matter (A) available for retention by such prospective purchaser, and (B) sent by mail to such prospective purchaser upon his request; and

(2) the first person who purchases a manufactured home for purposes other than resale, at the time of such purchase or in printed matter placed in the manufactured home.

(h) Disclosure of confidential information and trade secrets

All information reported to or otherwise obtained by the Secretary or his representative pursuant to subsection (b), (c), (f), or (g) of this section which contains or relates to a trade secret, or which, if disclosed, would put the person furnishing such information at a substantial competitive disadvantage, shall be considered confidential, except that such information may be disclosed to other officers or employees concerned with carrying out this chapter or when relevant in any proceeding under this chapter. Nothing in this section shall authorize the withholding of information by the Secretary or any officer or employee under his control from the duly authorized committees of the Congress.

L. 106-569, set out as a note under section 5401 of this title.

§5414. Notification and correction of defects by manufacturer

(a) Notice to purchaser within reasonable time after discovery of defect

Every manufacturer of manufactured homes shall furnish notification of any defect in any manufactured home produced by such manufacturer which he determines, in good faith, relates to a Federal manufactured home construction or safety standard or contains a defect which constitutes an imminent safety hazard to the purchaser of such manufactured home, within a reasonable time after such manufacturer has discovered such defect.

(b) Notification by mail

The notification required by subsection (a) of this section shall be accomplished—

(1) by mail to the first purchaser (not including any retailer or distributor of such manufacturer) of the manufactured home containing the defect, and to any subsequent purchaser to whom any warranty on such manufactured home has been transferred;

(2) by mail to any other person who is a registered owner of such manufactured home and whose name and address has been ascertained pursuant to procedures established under subsection (f) of this section; and

(3) by mail or other more expeditious means to the retailer or retailers of such manufacturer to whom such manufactured home was delivered.

(c) Form and requisites of notification

The notification required by subsection (a) of this section shall contain a clear description of such defect or failure to comply, an evaluation of the risk to manufactured home occupants' safety reasonably related to such defect, and a statement of the measures needed to repair the defect. The notification shall also inform the owner whether the defect is a construction or safety defect which the manufacturer will have corrected at no cost to the owner of the manufactured home under subsection (g) of this sec-

tion or otherwise, or is a defect which must be corrected at the expense of the owner.

(d) Copy to Secretary of all notices, bulletins, and communications sent by manufacturer to retailers and purchasers concerning defects; disclosure to public by Secretary

Every manufacturer of manufactured homes shall furnish to the Secretary a true or representative copy of all notices, bulletins, and other communications to the retailers of such manufacturer or purchasers of manufactured homes of such manufacturer regarding any defect in any such manufactured home produced by such manufacturer. The Secretary shall disclose to the public so much of the information contained in such notices or other information obtained under section 5413 of this title as he deems will assist in carrying out the purposes of this chapter, but he shall not disclose any information which contains or relates to a trade secret, or which, if disclosed, would put such manufacturer at a substantial competitive disadvantage, unless he determines that it is necessary to carry out the purposes of this chapter.

(e) Notice by Secretary to manufacturers of non-compliance with standards or defective nature of manufactured home; contents of notice; presentation by manufacturer of views; notice to purchasers of defects

If the Secretary determines that any manufactured home—

(1) does not comply with an applicable Federal manufactured home construction and safety standard prescribed pursuant to section 5403 of this title; or

(2) contains a defect which constitutes an imminent safety hazard,

then he shall immediately notify the manufacturer of such manufactured home of such defect or failure to comply. The notice shall contain the findings of the Secretary and shall include all information upon which the findings are based. The Secretary shall afford such manufacturer an opportunity to present his views and evidence in support thereof, to establish that there is no failure of compliance. If after such presentation by the manufacturer the Secretary determines that such manufactured home does not comply with applicable Federal manufactured home construction or safety standards, or contains a defect which constitutes an imminent safety hazard, the Secretary shall direct the manufacturer to furnish the notification specified in subsections (a) and (b) of this section.

(f) Maintenance by manufacturers of record of names and addresses of first purchasers of manufactured homes; procedures for ascertaining names and addresses of subsequent purchasers; establishment and reasonableness of procedures for maintaining records

Every manufacturer of manufactured homes shall maintain a record of the name and address of the first purchaser of each manufactured home (for purposes other than resale), and, to the maximum extent feasible, shall maintain procedures for ascertaining the name and address of any subsequent purchaser thereof and shall maintain a record of names and addresses

so ascertained. Such records shall be kept for each home produced by a manufacturer. The Secretary may establish by order procedures to be followed by manufacturers in establishing and maintaining such records, including procedures to be followed by distributors and retailers to assist manufacturers to secure the information required by this subsection. Such procedures shall be reasonable for the particular type of manufactured home for which they are prescribed.

(g) Correction of defects by manufacturer; conditions; procedures; contract or legal rights of purchasers or other persons unaffected

A manufacturer required to furnish notification of a defect under subsection (a) or (e) of this section shall also bring the manufactured home into compliance with applicable standards and correct the defect or have the defect corrected within a reasonable period of time at no expense to the owner, but only if—

(1) the defect presents an unreasonable risk of injury or death to occupants of the affected manufactured home or homes;

(2) the defect can be related to an error in design or assembly of the manufactured home by the manufacturer.

The Secretary may direct the manufacturer to make such corrections after providing an opportunity for oral and written presentation of views by interested persons. Nothing in this section shall limit the rights of the purchaser or any other person under any contract or applicable law.

(h) Submission to Secretary by manufacturer of plan for notifying owners of defects and repair of defects; approval of manufacturer's remedy plan; effectuation and implementation of remedy plan

The manufacturer shall submit his plan for notifying owners of the defect and for repairing such defect (if required under subsection (g) of this section) to the Secretary for his approval before implementing such plan. Whenever a manufacturer is required under subsection (g) of this section to correct a defect, the Secretary shall approve with or without modification, after consultation with the manufacturer of the manufactured home involved, such manufacturer's remedy plan including the date when, and the method by which, the notification and remedy required pursuant to this section shall be effectuated. Such date shall be the earliest practicable one but shall not be more than sixty days after the date of discovery or determination of the defect or failure to comply, unless the Secretary grants an extension of such period for good cause shown and publishes a notice of such extension in the Federal Register. Such manufacturer is bound to implement such remedy plan as approved by the Secretary.

(i) Defective or inadequately repaired manufactured homes; replacement with new or equivalent home or refund of purchase price

Where a defect or failure to comply in a manufactured home cannot be adequately repaired within sixty days from the date of discovery or determination of the defect, the Secretary may require that the manufactured home be replaced

with a new or equivalent home without charge, or that the purchase price be refunded in full, less a reasonable allowance for depreciation based on actual use if the home has been in the possession of the owner for more than one year.

(1) designates a State agency or agencies as the agency or agencies responsible for administering the plan throughout the State;

(2) provides for the enforcement of manufactured home safety and construction standards promulgated under section 5403 of this title;

(3) provides for a right of entry and inspection of all factories, warehouses, or establishments in such State in which manufactured homes are manufactured and for the review of plans, in a manner which is identical to that provided in section 5413 of this title;

Whenever the Secretary finds, after affording due notice and opportunity for a hearing, that in the administration of the

State plan there is a failure to comply substantially with any provision of the State plan or that the State plan has become inadequate, he shall notify the State agency or agencies of his withdrawal of approval of such plan. Upon receipt of such notice by such State agency or agencies such plan shall cease to be in effect, but the State may retain jurisdiction in any case commenced before the withdrawal of the plan in order to enforce manufactured home standards under the plan whenever the issues involved do not relate to the reasons for the withdrawal of the plan.

(g) Enforcement of dispute resolution standards

(1) Establishment of dispute resolution program

Not later than the expiration of the 5-year period beginning on December 27, 2000, the Secretary shall establish a dispute resolution program that meets the requirements of subsection (c)(12) of this section for dispute resolution in each State described in paragraph (2) of this subsection. SUBCHAPTER I—HEATING AND COOLING

§ 5501. Congressional findings and declaration of policy

(a) The Congress hereby finds that—

(1) the current imbalance between supply and demand for fuels and energy is likely to persist for some time;

(2) the early demonstration of the feasibility of using solar energy for the heating and cooling of buildings could help to relieve the demand upon present fuel and energy supplies;

(3) the technologies for solar heating are close to the point of commercial application in the United States;

(4) the technologies for combined solar heating and cooling still require research, development, testing and demonstration, but no insoluble technical problem is now foreseen in achieving commercial use of such technologies;

(5) the early development and export of viable solar heating equipment and combined solar heating and cooling equipment, consistent with the established preeminence of the United States in the field of high technology products, can make a valuable contribution to our balance of trade;

(6) the widespread use of solar energy in place of conventional methods for the heating and cooling of buildings would have a significantly beneficial effect upon the environment;

(7) the mass production and use of solar heating and cooling equipment will help to eliminate the dependence of the United States upon foreign energy sources and promote the national defense;

(8) the widespread introduction of low-cost solar energy will be beneficial to consumers in a period of rapidly rising fuel cost;

(9) innovation and creativity in the development of solar heating and combined solar heating and cooling components and systems can be fostered through encouraging direct contact between the manufacturers of such systems and the architects, engineers, developers, contractors, and other persons interested in installing such systems in buildings;

(10) evaluation of the performance and reliability of solar heating and combined solar heating and cooling technologies can be expedited by testing under carefully controlled conditions; and

(11) commercial application of solar heating and combined solar heating and cooling technologies can be expedited by early commercial demonstration under practical conditions.

SUBCHAPTER II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION

§ 5551. Congressional declaration of findings and policy

(a) The Congress hereby finds that—

(1) the needs of a viable society depend on an ample supply of energy;

(2) the current imbalance between domestic supply and demand for fuels and energy is likely to persist for some time;

(3) dependence on nonrenewable energy resources cannot be continued indefinitely, particularly at current rates of consumption;

(4) it is in the Nation's interest to expedite the long-term development of renewable and nonpolluting energy resources, such as solar energy;

(5) the various solar energy technologies are today at widely differing stages of development, with some already near the stage of commercial application and others still requiring basic research;

(6) the early development and export of viable equipment utilizing solar energy, consistent with the established preeminence of the United States in the field of high technology products, can make a valuable contribution to our balance of trade;

(7) the mass production and use of equipment utilizing solar energy will help to eliminate the dependence of the United States upon foreign energy sources and promote the national defense;

(8) to date, the national effort in research, development, and demonstration activities relating to the utilization of solar energy has been extremely limited; therefore

(9) the urgency of the Nation's critical energy shortages and the need to make clean and renewable energy alternatives commercially viable require that the Nation undertake an intensive research, development, and demonstration program with an estimated Federal investment which may reach or exceed \$1,000,000,000.

(b) The Congress declares that it is the policy of the Federal Government to—

(1) pursue a vigorous and viable program of research and resource assessment of solar energy as a major source of energy for our national needs; and

(2) provide for the development and demonstration of practicable means to employ solar energy on a commercial scale.

(Pub. L. 93-473, § 2, Oct. 26, 1974, 88 Stat. 1431.)

SUBCHAPTER III—SOLAR PHOTOVOLTAIC ENERGY RESEARCH, DEVELOPMENT AND DEMONSTRATION

§ 5581. Congressional findings and declaration of policy

(a) The Congress hereby finds that—

(1) the United States of America is faced with a finite and diminishing resource base of native fossil fuels, and as a consequence must develop as quickly as possible a diversified, pluralistic national energy capability and posture;

(2) the current imbalance between supply and demand for fuels and energy in the United States is likely to grow for many years;

(3) the early demonstration of the feasibility of using solar photovoltaic energy systems for the generation of electricity could help to relieve the demand on existing fuel and energy supplies;

(4) the national security and economic well-being of the United States is endangered by its dependence on imported energy supplies which are subject to resource limitations, artificial pricing mechanisms which do not accurately reflect supply and demand relationships, and supply interruptions;

(5) the early development and widespread utilization of photovoltaic energy systems could significantly expand the domestic energy resource base of the United States, thereby lessening its dependence on foreign supplies;

(6) the establishment of sizable markets for photovoltaic energy systems will justify private investment in plant and equipment necessary to realize the economies of scale, and will result in significant reductions in the unit costs of these systems;

(7) the use of solar photovoltaic energy systems for certain limited applications has already proved feasible;

(8) there appear to be no insoluble technical obstacles to the widespread commercial use of solar photovoltaic energy technologies;

(9) an aggressive research and development program should solve existing technical problems of solar photovoltaic systems; and, supported by an assured and growing market for photovoltaic systems during the next decade, should maximize the future contribution of solar photovoltaic energy to this Nation's future energy production;

(10) it is the proper and appropriate role of the Federal Government to undertake research, development, and demonstration programs in solar photovoltaic energy technologies and to supplement and assist private industry and other entities and thereby the general public, so as to hasten the general commercial use of such technologies;

(11) the high cost of imported energy sources impairs the economic growth of many nations which lack sizable domestic energy supplies or are unable to develop these resources;

(12) photovoltaic energy systems are economically competitive with conventional energy resources for a wide variety of applications in many foreign nations at the present time, and will find additional applications with continued cost reductions;

(13) the early development and export of solar photovoltaic energy systems, consistent with the established preeminence of the United States in the field of high technology products, can make a valuable contribution to the well-being of the people of other nations and to this Nation's balance of trade;

(14) the widespread use of solar photovoltaic energy systems to supplement and replace conventional methods for the generation of electricity would have a beneficial effect upon the environment;

(15) to increase the potential application of solar photovoltaic energy systems in remote locations, and to minimize the need for

backup systems depending on fossil fuel, programs leading to the development of inexpensive and reliable systems for the storage of electricity should be pursued as part of any solar photovoltaic energy research, development, and demonstration program;

(16) evaluation of the performance and reliability of solar photovoltaic energy technologies can be expedited by testing of prototypes under carefully controlled conditions;

(17) commercial application of solar photovoltaic energy technologies can be expedited by early commercial demonstration under practical conditions;

(18) photovoltaic energy systems are currently adaptable on a life cycle, cost-justified basis for certain of the energy needs of the Federal Government, and will find additional applications as continued refinements improve performance and reduce unit costs;

(19) the Federal Government can stimulate innovation and economic efficiency in the production of photovoltaic energy systems through the development and implementation of policies to promote diversity and maximum competition between firms engaged in the research, manufacture, installation, and/or maintenance of these systems;

(20) innovation and creativity in the development of solar photovoltaic energy components and systems can be fostered through encouraging direct contact between the manufacturers of such systems and the architects, engineers, developers, contractors, and other persons interested in utilizing such systems; and

(21) it is contemplated that the ten-year program established by this subchapter will require the expenditure of \$1,500,000,000 by the Federal Government.

(b) It is therefore declared to be the policy of the United States and the purpose of this subchapter to establish during the next decade an aggressive research, development, and demonstration program involving solar photovoltaic energy systems and in the long term, to have as an objective the production of electricity from photovoltaic systems cost competitive with utility-generated electricity from conventional sources. Further, it is declared to be the policy of the United States and the purpose of this subchapter that the objectives of this research, development, and demonstration program are—

(1) to double the production of solar photovoltaic energy systems each year during the decade starting with fiscal year 1979, measured by the peak generating capacity of the systems produced, so as to reach a total annual United States production of solar photovoltaic energy systems of approximately two million peak kilowatts, and a total cumulative production of such systems of approximately four million peak kilowatts by fiscal year 1988;

(2) to reduce the average cost of installed solar photovoltaic energy systems to \$1 per peak watt by fiscal year 1988; and

(3) to stimulate the purchase by private buyers of at least 90 per centum of all solar photovoltaic energy systems produced in the United States during fiscal year 1988.

(Pub. L. 95-590, § 2, Nov. 4, 1978, 92 Stat. 2513.)

(2) the need for and timing of solar photovoltaic energy systems demonstration projects;

(3) the need for change in any research, development, or demonstration program established under this subchapter; and

(4) the economic, technological, and environmental consequences of the use of solar photovoltaic energy systems.

(b) Membership; chairman

The Committee shall be composed of thirteen members, including eleven members appointed by the Secretary from industrial organizations, academic institutions, professional societies or institutions, and other sources as he sees fit, and two members of the public appointed by the President. The Chairman of the Committee shall be elected from among the members thereof.

(c) Cooperation from executive departments, agencies, and instrumentalities

The heads of the departments, agencies, and instrumentalities of the executive branch of the

Federal Government shall cooperate with the Committee in carrying out the requirements of this section, and shall furnish to the Committee such information as the Committee deems necessary to carry out this section.

(Pub. L. 95-590, § 9, Nov. 4, 1978, 92 Stat. 2518.)

TERMINATION OF ADVISORY COMMITTEES

Advisory committees established after Jan. 5, 1973, to terminate not later than the expiration of the 2-year period beginning on the date of their establishment, unless, in the case of a committee established by the President or an officer of the Federal Government, such committee is renewed by appropriate action prior to the expiration of such 2-year period, or in the case of a committee established by the Congress, its duration is otherwise provided for by law. See section 14 of Pub. L. 92-463, Oct. 6, 1972, 86 Stat. 776, set out in the Appendix to Title 5, Government Organization and Employees.

§ 5589. Promotion and facilitation of practical use of photovoltaic energy

(a) Dissemination of information; trade secret exemption

The Secretary shall take all possible steps to assure that full and complete information with respect to the demonstrations and other activities conducted under this subchapter is made available to Federal, State, and local authorities, relevant segments of the economy, the scientific and technical community, and the public at large, both during and after the close of the programs under this subchapter, with the objective of promoting and facilitating to the maximum extent feasible the early and widespread practical use of photovoltaic energy throughout the United States. Any trade secret or other proprietary information shall be exempted from such mandatory disclosure, as otherwise specified in law applicable to research, development and demonstration programs of the Department of Energy, including, but not limited to, section 5916 of this title.

(b) Studies and investigations

The Secretary shall—

(1) study the effect of the widespread utilization of photovoltaic systems on the existing electric utility system at varying levels of photovoltaic contribution to the system;

(2) study and investigate the effect of utility rate structures, building codes, zoning ordinances, and other laws, codes, ordinances, and practices upon the practical use of photovoltaic systems;

(3) determine the extent to which such laws, codes, ordinances, and practices should be changed to permit or facilitate such use and the methods by which any such changes may best be accomplished; and

(4) determine the necessity of a program of incentives to accelerate the commercial application of photovoltaic technologies.

(c) Policy recommendations to President and Congress

The Secretary is authorized and directed, within one year of November 4, 1978, to make

recommendations to the President and to the Congress for Federal policies relating to barriers to the early and widespread utilization of photovoltaic systems in order to realize the goals set forth in section 5581 of this title. These recommendations shall include but not be limited to—

(1) the potential for integration of electricity derived from photovoltaic energy systems into the existing national grid system, including the potential of photovoltaic-generated electricity to meet the peak-load energy needs of electric utilities, load management and reliability implications of the utilization of photovoltaic electricity by utilities, the implications of utility ownership of photovoltaic components leased to others primarily for decentralized applications, the impacts of utility use of electricity derived from photovoltaic energy systems on utility rate structures, and the potential for reducing or obviating the need for energy storage components for photovoltaic energy systems through utility interface;

(2) the extent of competition between firms currently engaged in the fabrication and installation of photovoltaics components and systems as it affects the character and growth potential of the American photovoltaics industry, and the likelihood that small photovoltaic firms will have reasonable opportunities to compete and participate in the various programs authorized by this subchapter;

(3) the need to identify legal alternatives to ensure access to direct sunlight for photovoltaic energy systems, the appropriate methods of encouraging the adoption of such alternatives, and the implications of widespread utilization of photovoltaic energy systems for land use and urban development;

(4) the availability of private capital at reasonable interest rates for individuals, businesses and others desiring to establish commercial enterprises to manufacture, market, install, and/or, maintain photovoltaic components and systems, or purchase and install such systems for private, industrial, agricultural, commercial or other uses;

(5) the need for industry-wide warranty and reliability standards for photovoltaic energy components and systems for private sector applications, and, if appropriate, the mechanisms for establishing such standards; and

(6) the attainability of the goals specified in section 5581(b) of this title, and any modification of such goals which the Secretary proposes for consideration by Congress, with supporting analyses.

(d) Consultation with government agencies, industry representatives, and scientific and technical community; coordination and merger of studies and reports

In carrying out his functions under this section, the Secretary shall consult with the appropriate government agencies, industry representatives, and members of the scientific and technical community having expertise and interest in this area. The Secretary also shall ensure that any study or report prepared pursuant to this section is fully coordinated with and reflective of any analyses or reports prepared pursu-

ant to the requirements in section 5556a of this title, and in the President's Solar Energy Domestic Policy Review. The Secretary, as appropriate, may merge any continuing or on-going studies under section 5556a of this title or the Domestic Policy Review with those required by this section or avoid any unnecessary duplication of effort or funding. The separate report requirements of section 5556a of this title and this section, however, shall remain in force.

(Pub. L. 95-590, § 10, Nov. 4, 1978, 92 Stat. 2519.)

§ 5590. Submittal to Congressional committees of plan for demonstrating applications of photovoltaic systems and facilitating use in other nations; encouragement of international participation and cooperation; coordination and consistency of plan and international activities with similar activities and programs

(a) Within one year after November 4, 1978, the Secretary, in consultation with the Secretary of State, the Administrator of the Agency for International Development, the Director of the Export/Import Bank and other appropriate Federal officials, shall submit to the House Committee on Science and Technology and the Senate Committee on Energy and Natural Resources a plan for demonstrating applications of solar photovoltaic energy systems and facilitating their widespread use in other nations, especially those with agreements for scientific cooperation with the United States.

(b) The Secretary is authorized to encourage, to the maximum extent practicable, international participation and cooperation in the development and maintenance of programs established under this plan. The Secretary, in consultation and cooperation with the Federal officials specified in subsection (a) of this section, shall insure to the maximum extent possible that the plan submitted under subsection (a) of this section and any other international activities under this section are consistent with and reflective of any similar activities or requirements under any other Federal statute, specifically including any of the several programs under other agencies and Departments involving United States international cooperation and assistance in nonnuclear energy technology, and will not duplicate activities under such programs. The plan required in subsection (a) of this section shall specifically identify all such programs and statutes and describe how the activities under this section will be consistent with such programs, will be coordinated with them, and will avoid duplication of activities under such programs.

(Pub. L. 95-590, § 11, Nov. 4, 1978, 92 Stat. 2520; Pub. L. 103-82, title IV, § 405(j), Sept. 21, 1993, 107 Stat. 922.)

SUBCHAPTER I—GENERALLY

§ 5601. Findings

(a) The Congress finds the following:

(1) Although the juvenile violent crime arrest rate in 1999 was the lowest in the decade, there remains a consensus that the number of crimes and the rate of offending by juveniles nationwide is still too high.

(2) According to the Office of Juvenile Justice and Delinquency Prevention, allowing 1 youth to leave school for a life of crime and of drug abuse costs society \$1,700,000 to \$2,300,000 annually.

(3) One in every 6 individuals (16.2 percent) arrested for committing violent crime in 1999 was less than 18 years of age. In 1999, juveniles accounted for 9 percent of murder arrests, 17 percent of forcible rape arrests, 25 percent of robbery arrest, 14 percent of aggravated assault arrests, and 24 percent of weapons arrests.

(4) More than ½ of juvenile murder victims are killed with firearms. Of the nearly 1,800

murder victims less than 18 years of age, 17 percent of the victims less than 13 years of age were murdered with a firearm, and 81 percent of the victims 13 years of age or older were killed with a firearm.

(5) Juveniles accounted for 13 percent of all drug abuse violation arrests in 1999. Between 1990 and 1999, juvenile arrests for drug abuse violations rose 132 percent.

(6) Over the last 3 decades, youth gang problems have increased nationwide. In the 1970's, 19 States reported youth gang problems. By the late 1990's, all 50 States and the District of Columbia reported gang problems. For the same period, the number of cities reporting youth gang problems grew 843 percent, and the number of counties reporting gang problems increased more than 1,000 percent.

(7) According to a national crime survey of individuals 12 years of age or older during 1999, those 12 to 19 years old are victims of violent crime at higher rates than individuals in all other age groups. Only 30.8 percent of these violent victimizations were reported by youth to police in 1999.

(8) One-fifth of juveniles 16 years of age who had been arrested were first arrested before attaining 12 years of age. Juveniles who are known to the juvenile justice system before attaining 13 years of age are responsible for a disproportionate share of serious crimes and violence.

(9) The increase in the arrest rates for girls and young juvenile offenders has changed the composition of violent offenders entering the juvenile justice system.

(10) These problems should be addressed through a 2-track common sense approach that addresses the needs of individual juveniles and society at large by promoting—

(A) quality prevention programs that—

(i) work with juveniles, their families, local public agencies, and community-based organizations, and take into consideration such factors as whether or not juveniles have been the victims of family violence (including child abuse and neglect); and

(ii) are designed to reduce risks and develop competencies in at-risk juveniles that will prevent, and reduce the rate of, violent delinquent behavior; and

(B) programs that assist in holding juveniles accountable for their actions and in developing the competencies necessary to become responsible and productive members of their communities, including a system of graduated sanctions to respond to each delinquent act, requiring juveniles to make restitution, or perform community service, for the damage caused by their delinquent acts, and methods for increasing victim satisfaction with respect to the penalties imposed on juveniles for their acts.

(11) Coordinated juvenile justice and delinquency prevention projects that meet the needs of juveniles through the collaboration of the many local service systems juveniles encounter can help prevent juveniles from becoming delinquent and help delinquent youth return to a productive life.

(b) Congress must act now to reform this program by focusing on juvenile delinquency prevention programs, as well as programs that hold juveniles accountable for their acts and which provide opportunities for competency development. Without true reform, the juvenile justice system will not be able to overcome the challenges it will face in the coming years when the number of juveniles is expected to increase by 18 percent between 2000 and 2030.

AMENDMENTS

2002—Pub. L. 107-273 amended heading and text generally. Prior to amendment, text read as follows:

“(a) The Congress hereby finds that—

“(1) juveniles accounted for almost half the arrests for serious crimes in the United States in 1974 and for less than one-third of such arrests in 1983;

“(2) recent trends show an upsurge in arrests of adolescents for murder, assault, and weapon use;

“(3) the small number of youth who commit the most serious and violent offenses are becoming more violent;

“(4) understaffed, overcrowded juvenile courts, prosecutorial and public defender offices, probation services, and correctional facilities and inadequately trained staff in such courts, services, and facilities are not able to provide individualized justice or effective help;

“(5) present juvenile courts, foster and protective care programs, and shelter facilities are inadequate to meet the needs of children, who, because of this failure to provide effective services, may become delinquents;

“(6) existing programs have not adequately responded to the particular problems of the increasing numbers of young people who are addicted to or who abuse alcohol and other drugs, particularly nonopiate or polydrug abusers;

“(7) juvenile delinquency can be reduced through programs designed to keep students in elementary and secondary schools through the prevention of unwarranted and arbitrary suspensions and expulsions;

“(8) States and local communities which experience directly the devastating failures of the juvenile justice system do not presently have sufficient technical expertise or adequate resources to deal comprehensively with the problems of juvenile delinquency;

“(9) existing Federal programs have not provided the direction, coordination, resources, and leadership required to meet the crisis of delinquency;

“(10) the juvenile justice system should give additional attention to the problem of juveniles who commit serious crimes, with particular attention given to the areas of sentencing, providing resources necessary for informed dispositions, and rehabilitation;

“(11) emphasis should be placed on preventing youth from entering the juvenile justice system to begin with; and

“(12) the incidence of juvenile delinquency can be reduced through public recreation programs and activities designed to provide youth with social skills, enhance self esteem, and encourage the constructive use of discretionary time.

“(b) Congress finds further that the high incidence of delinquency in the United States today results in enormous annual cost and immeasurable loss of human life, personal security, and wasted human resources and that juvenile delinquency constitutes a growing threat to the national welfare requiring immediate and comprehensive action by the Federal Government to reduce and prevent delinquency.”

1992—Subsec. (a)(2), (3). Pub. L. 102-586, § 1(a)(2), added pars. (2) and (3). Former pars. (2) and (3) redesignated (4) and (5), respectively.

§ 5656. Grants to Indian tribes**(a) Eligibility****(1) Application**

To be eligible to receive a grant under section 5651(b) of this title, an Indian tribe shall submit to the Administrator an application in accordance with this section, in such form and containing such information as the Administrator may require by rule.

(2) Plans

Such application shall include a plan for conducting programs, projects, and activities described in section 5651(a) of this title, which plan shall—

(A) provide evidence that the applicant Indian tribe performs law enforcement functions (as determined by the Secretary of the Interior);

(B) identify the juvenile justice and delinquency problems and juvenile delinquency prevention needs to be addressed by activities conducted with funds provided by the grant for which such application is submitted, by the Indian tribe in the geographical area under the jurisdiction of the Indian tribe;

SUBCHAPTER III—RUNAWAY AND HOMELESS YOUTH

§ 5701. Findings

The Congress finds that—

(1) youth who have become homeless or who leave and remain away from home without parental permission, are at risk of developing, and have a disproportionate share of, serious health, behavioral, and emotional problems because they lack sufficient resources to obtain care and may live on the street for extended periods thereby endangering themselves and creating a substantial law enforcement problem for communities in which they congregate;

(2) many such young people, because of their age and situation, are urgently in need of temporary shelter and services, including services that are linguistically appropriate and acknowledge the environment of youth seeking these services;

(3) in view of the interstate nature of the problem, it is the responsibility of the Federal Government to develop an accurate national reporting system to report the problem, and to assist in the development of an effective system of care (including preventive and after-care services, emergency shelter services, extended residential shelter, and street outreach services) outside the welfare system and the law enforcement system;

(4) to make a successful transition to adulthood, runaway youth, homeless youth, and other street youth need opportunities to complete high school or earn a general equivalency degree, learn job skills, and obtain employment; and

(5) improved coordination and collaboration between the Federal programs that serve run-

away and homeless youth are necessary for the development of a long-term strategy for responding to the needs of this population.

SUBCHAPTER IV—MISSING CHILDREN

§ 5771. Findings

The Congress finds that—

(1) each year thousands of children are abducted or removed from the control of a parent having legal custody without such parent's consent, under circumstances which immediately place the child in grave danger;

(2) many missing children are at great risk of both physical harm and sexual exploitation;

(3) in many cases, parents and local law enforcement officials have neither the resources nor the expertise to mount expanded search efforts;

(4) abducted children are frequently moved from one locality to another, requiring the cooperation and coordination of local, State, and Federal law enforcement efforts;

(5) the National Center for Missing and Exploited Children—

(A) serves as the national resource center and clearinghouse;

(B) works in partnership with the Department of Justice, the Federal Bureau of Investigation, the Department of the Treasury, the Department of State, and many other agencies in the effort to find missing children and prevent child victimization; and

(C) operates a national and increasingly worldwide network, linking the Center online with each of the missing children clearinghouses operated by the 50 States, the District of Columbia, and Puerto Rico, as well as with Scotland Yard in the United Kingdom, the Royal Canadian Mounted Police, INTERPOL headquarters in Lyon, France, and others, which enable the Center to transmit images and information regarding missing children to law enforcement across

the United States and around the world instantly.

-------	--------------------------------

§ 5801. Congressional declaration of policy and purpose

(a) Development and utilization of energy sources

The Congress hereby declares that the general welfare and the common defense and security require effective action to develop, and increase the efficiency and reliability of use of, all energy sources to meet the needs of present and future generations, to increase the productivity of the national economy and strengthen its position in regard to international trade, to make the Nation self-sufficient in energy, to advance the goals of restoring, protecting, and enhancing environmental quality, and to assure public health and safety.

(b) Necessity of establishing Energy Research and Development Administration

The Congress finds that, to best achieve these objectives, improve Government operations, and assure the coordinated and effective development of all energy sources, it is necessary to establish an Energy Research and Development Administration to bring together and direct Federal activities relating to research and development on the various sources of energy, to increase the efficiency and reliability in the use of energy, and to carry out the performance of other functions, including but not limited to the Atomic Energy Commission's military and production activities and its general basic research activities. In establishing an Energy Research and Development Administration to achieve these objectives, the Congress intends that all possible sources of energy be developed consistent with warranted priorities.

(c) Separation of licensing and regulatory functions of Atomic Energy Commission

The Congress finds that it is in the public interest that the licensing and related regulatory functions of the Atomic Energy Commission be separated from the performance of the other functions of the Commission, and that this separation be effected in an orderly manner, pursuant to this chapter, assuring adequacy of technical and other resources necessary for the performance of each.

ration be effected in an orderly manner, pursuant to this chapter, assuring adequacy of technical and other resources necessary for the performance of each.

(d) Small business participation

The Congress declares that it is in the public interest and the policy of Congress that small business concerns be given a reasonable opportunity to participate, insofar as is possible, fairly and equitably in grants, contracts, purchases, and other Federal activities relating to research, development, and demonstration of sources of energy efficiency, and utilization and conservation of energy. In carrying out this policy, to the extent practicable, the Administrator shall consult with the Administrator of the Small Business Administration.

(e) Priorities

Determination of priorities which are warranted should be based on such considerations as power-related values of an energy source, preservation of material resources, reduction of pollutants, export market potential (including reduction of imports), among others. On such a basis, energy sources warranting priority might include, but not be limited to, the various methods of utilizing solar energy.

Similar provisions were contained in Pub. L. 94-86, § 5, Aug. 9, 1975, 89 Stat. 430.

§ 5821. Annual authorization Acts

(a) General requirements; applicability to appropriations

All appropriations made to the Energy Research and Development Administration or the Administrator shall, except as otherwise provided by law, be subject to annual authorization in accordance with section 2017 of this title, section 5915 of this title, and section 5875 of this title. The provisions of this section shall apply with respect to appropriations made pursuant to the Act providing such authorization (hereinafter in this section referred to as “annual authorization Acts”).

(b) Requirements and limitations respecting funds appropriated for operating expenses

(1) Funds appropriated pursuant to an annual authorization Act for “Operating expenses” may be used for—

(A) the construction or acquisition of any facilities, or major items of equipment, which

may be required at locations other than installations of the Administration, for the performance of research, development, and demonstration activities, and

(B) grants to any organization for purchase or construction of research facilities.

No such funds shall be used under this subsection for the acquisition of land. Fee title to all such facilities and items of equipment shall be vested in the United States, unless the Administrator or his designee determines in writing that the research, development, and demonstration authorized by such Act would best be implemented by permitting fee title or any other property interest to be vested in an entity other than the United States; but before approving the vesting of such title or interest in such entity, the Administrator shall (i) transmit such determination, together with all pertinent data, to the Committee on Science, Space, and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate and (ii) wait a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(2) No funds shall be used under paragraph (1) for any facility or major item of equipment, including collateral equipment, if the estimated cost to the Federal Government exceeds \$5,000,000 in the case of such a facility or \$2,000,000 in the case of such an item of equipment, unless such facility or item has been previously authorized by the appropriate committees of the House of Representatives and the Senate, or the Administrator—

(A) transmit to the appropriate committees of the House of Representatives and the Senate a report on such facility or item showing its nature, purpose, and estimated cost, and

(B) waits a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(c) Additional requirements and limitations respecting funds appropriated for operating expenses

(1) Not to exceed 1 per centum of all funds appropriated pursuant to any annual authorization Act for "Operating expenses" may be used by the Administrator to construct, expand, or modify laboratories and other facilities, including the acquisition of land, at any location under the control of the Administrator, if the Administrator determines that (A) such action would be necessary because of changes in the national programs authorized to be funded by such Act or because of new scientific or engineering developments, and (B) deferral of such action until the enactment of the next authorization Act would

be inconsistent with the policies established by Congress for the Administration.

(2) No funds may be obligated for expenditure or expended under paragraph (1) for activities described in such paragraph unless—

(A) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the Administrator has transmitted to the appropriate committees of the House of Representatives and the Senate a written report containing a full and complete statement concerning (i) the nature of the construction, expansion, or modification involved, (ii) the cost thereof, including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary and in the national interest, or

(B) each such committee before the expiration of such period has transmitted to the Administrator a written notice to the effect that such committee has no objection to the proposed action;

except that this paragraph shall not apply to any project the estimated total cost of which does not exceed \$50,000.

(d) Requirements respecting amounts appropriated in annual appropriation Act for use in programs in excess of amount actually authorized for use in program not presented to, or requested of Congress; reduction in aggregate amount available for categories of coal, etc., from sums appropriated

(1) Except as otherwise provided in the authorization Act involved—

(A) no amount appropriated pursuant to any annual authorization Act may be used for any program in excess of the amount actually authorized for that particular program by such Act, and

(B) no amount appropriated pursuant to any annual authorization Act may be used for any program which has not been presented to, or requested of the Congress,

unless (i) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the receipt by the appropriate committees of the House of Representatives and the Senate of notice given by the Administrator containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or (ii) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(2) Notwithstanding any other provision of this section or the authorization Act involved, the aggregate amount available for use within the categories of coal, petroleum and natural gas, oil shale, solar, geothermal, nuclear energy (non-weapons), environment and safety, and conservation from sums appropriated pursuant to an annual authorization Act may not, as a re-

sult of reprogramming, be decreased by more than 10 per centum of the total of the sums appropriated pursuant to such Act for those categories.

(e) Requirements and limitations respecting merger of amounts appropriated for operating expenses or for plant and capital equipment

Subject to the applicable requirements and limitations of this section and the authorization Act involved, when so specified in an appropriation Act, amounts appropriated pursuant to any annual authorization Act for “Operating expenses” or for “Plant and capital equipment” may be merged with any other amounts appropriated for like purposes pursuant to any other Act authorizing appropriations for the Administration: *Provided*, That no such amounts appropriated for “Plant and capital equipment” may be merged with amounts appropriated for “Operating expenses”.

(f) Availability until expended of amounts appropriated for operating expenses or for plant and capital equipment

When so specified in an appropriation Act, amounts appropriated pursuant to any annual authorization Act for “Operating expenses” or for “Plant and capital equipment” may remain available until expended.

(g) Performance of construction design services by Administrator

The Administrator is authorized to perform construction design services for any administration construction project whenever (1) such construction project has been included in a proposed authorization bill transmitted to the Congress by the Administration, and (2) the Administration determines that the project is of such urgency in order to meet the needs of national defense or protection of life and property or health and safety that construction of the project should be initiated promptly upon enactment of legislation appropriating funds for its construction.

(h) Retention and use for operating expenses, and availability until expended, of moneys received by Administration; exceptions

When so specified in appropriation Acts, any moneys received by the Administration may be retained and used for operating expenses, and may remain available until expended, notwithstanding the provisions of section 3302(b) of title 31; except that—

(1) this subsection shall not apply with respect to sums received from disposal of property under the Atomic Energy Community Act of 1955 [42 U.S.C. 2301 et seq.] or the Strategic and Critical Materials Stockpiling Act, as amended [50 U.S.C. 98 et seq.], or with respect to fees received for tests or investigations under the Act of May 16, 1910, as amended (30 U.S.C. 7); and

(2) revenues received by the Administration from the enrichment of uranium shall (when so specified) be retained and used for the specific purpose of offsetting costs incurred by the Administration in providing uranium enrichment service activities.

(i) Requirements respecting transfers of sums appropriated for operating expenses to other Government agencies; merger of transferred sums

When so specified in an appropriation Act, transfers of sums from the “Operating expenses” appropriation made pursuant to an annual authorization Act may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred may be merged with the appropriations to which they are transferred.

Pub. L. 100-202, §101(d) [title III, §300], Dec. 22, 1987, 101 Stat. 1329-104, 1329-121, and Pub. L. 100-203, title V, §5062, Dec. 22, 1987, 101 Stat. 1330-251, provided that:

“(a) IN GENERAL.—Notwithstanding any other provision of law, no form of plutonium may be transported by aircraft through the air space of the United States from a foreign nation to a foreign nation unless the Nuclear Regulatory Commission has certified to Congress that the container in which such plutonium is transported is safe, as determined in accordance with subsection (b), the second undesignated paragraph under section 201 of Public Law 94-79 (89 Stat. 413; 42 U.S.C. 5841 note), and all other applicable laws.

“(b) RESPONSIBILITIES OF THE NUCLEAR REGULATORY COMMISSION.—

“(1) DETERMINATION OF SAFETY.—The Nuclear Regulatory Commission shall determine whether the container referred to in subsection (a) is safe for use in the transportation of plutonium by aircraft and transmit to Congress a certification for the purposes of such subsection in the case of each container determined to be safe.

“(2) TESTING.—In order to make a determination with respect to a container under paragraph (1), the Nuclear Regulatory Commission shall—

“(A) require an actual drop test from maximum cruising altitude of a full-scale sample of such container loaded with test materials; and

“(B) require an actual crash test of a cargo aircraft fully loaded with full-scale samples of such container loaded with test material unless the Commission determines, after consultation with an independent scientific review panel, that the stresses on the container produced by other tests used in developing the container exceed the stresses which would occur during a worst case plutonium air shipment accident.

“(3) LIMITATION.—The Nuclear Regulatory Commission may not certify under this section that a container is safe for use in the transportation of plutonium by aircraft if the container ruptured or released its contents during testing conducted in accordance with paragraph (2).

“(4) EVALUATION.—The Nuclear Regulatory Commission shall evaluate the container certification required by title II of the Energy Reorganization Act of 1974 (42 U.S.C. 5841 et seq.) and subsection (a) in accordance with the National Environmental Policy Act of 1969 (83 Stat. 852; 42 U.S.C. 4321 et seq.) and all other applicable law.

“(c) CONTENT OF CERTIFICATION.—A certification referred to in subsection (a) with respect to a container shall include—

“(1) the determination of the Nuclear Regulatory Commission as to the safety of such container;

“(2) a statement that the requirements of subsection (b)(2) were satisfied in the testing of such container; and

“(3) a statement that the container did not rupture or release its contents into the environment during testing.

“(d) DESIGN OF TESTING PROCEDURES.—The tests required by subsection (b) shall be designed by the Nu-

clear Regulatory Commission to replicate actual worst case transportation conditions to the maximum extent practicable. In designing such tests, the Commission shall provide for public notice of the proposed test procedures, provide a reasonable opportunity for public comment on such procedures, and consider such comments, if any.

“(e) TESTING RESULTS: REPORTS AND PUBLIC DISCLOSURE.—The Nuclear Regulatory Commission shall transmit to Congress a report on the results of each test conducted under this section and shall make such results available to the public.

“(f) ALTERNATIVE ROUTES AND MEANS OF TRANSPORTATION.—With respect to any shipments of plutonium from a foreign nation to a foreign nation which are subject to United States consent rights contained in an Agreement for Peaceful Nuclear Cooperation, the President is authorized to make every effort to pursue and conclude arrangements for alternative routes and means of transportation, including sea shipment. All such arrangements shall be subject to stringent physical security conditions, and other conditions designed to protect the public health and safety, and provisions of this section, and all other applicable laws.

“(g) INAPPLICABILITY TO MEDICAL DEVICES.—Subsections (a) through (e) shall not apply with respect to plutonium in any form contained in a medical device designed for individual human application.

“(h) INAPPLICABILITY TO MILITARY USES.—Subsections (a) through (e) shall not apply to plutonium in the form of nuclear weapons nor to other shipments of plutonium determined by the Department of Energy to be directly connected with the United States national security or defense programs.

“(i) INAPPLICABILITY TO PREVIOUSLY CERTIFIED CONTAINERS.—This section shall not apply to any containers for the shipment of plutonium previously certified as safe by the Nuclear Regulatory Commission under Public Law 94-79 (89 Stat. 413; 42 U.S.C. 5841 note).

“(j) PAYMENT OF COSTS.—All costs incurred by the Nuclear Regulatory Commission associated with the testing program required by this section, and administrative costs related thereto, shall be reimbursed to the Nuclear Regulatory Commission by any foreign country receiving plutonium shipped through United States airspace in containers specified by the Commission.”

RESIDENT INSPECTOR PROGRAM; IMPLEMENTATION AND ACCELERATION OF ASSIGNMENT OF PERSONNEL; STUDY OF EXISTING AND ALTERNATE PROGRAMS FOR IMPROVING QUALITY ASSURANCE AND CONTROL; PILOT PROGRAMS TO REVIEW AND EVALUATE ALTERNATIVE PROGRAMS; SCOPE OF PILOT PROGRAM; REPORT TO CONGRESS; CONTENTS

Pub. L. 97-415, §13, Jan. 4, 1983, 96 Stat. 2074, provided that:

“(a) The Nuclear Regulatory Commission is authorized and directed to implement and accelerate the resident inspector program so as to assure the assignment of at least one resident inspector by the end of fiscal year 1982 at each site at which a commercial nuclear powerplant is under construction and construction is more than 15 percent complete. At each such site at which construction is not more than 15 percent complete, the Commission shall provide that such inspection personnel as the Commission deems appropriate shall be physically present at the site at such times following issuance of the construction permit as may be necessary in the judgment of the Commission.

“(b) The Commission shall conduct a study of existing and alternative programs for improving quality assurance and quality control in the construction of commercial nuclear powerplants. In conducting the study, the Commission shall obtain the comments of the public, licensees of nuclear powerplants, the Advisory Committee on Reactor Safeguards, and organizations comprised of professionals having expertise in appropriate fields. The study shall include an analysis of the following:

“(1) providing a basis for quality assurance and quality control, inspection, and enforcement actions

through the adoption of an approach which is more prescriptive than that currently in practice for defining principal architectural and engineering criteria for the construction of commercial nuclear powerplants;

“(2) conditioning the issuance of construction permits for commercial nuclear powerplants on a demonstration by the licensee that the licensee is capable of independently managing the effective performance of all quality assurance and quality control responsibilities for the powerplant;

“(3) evaluations, inspections, or audits of commercial nuclear powerplant construction by organizations comprised of professionals having expertise in appropriate fields which evaluations, inspections, or audits are more effective than those under current practice;

“(4) improvement of the Commission's organization, methods, and programs for quality assurance development, review, and inspection; and

“(5) conditioning the issuance of construction permits for commercial nuclear powerplants on the permittee entering into contracts or other arrangements with an independent inspector to audit the quality assurance program to verify quality assurance performance.

For purposes of paragraph (5), the term ‘independent inspector’ means a person or other entity having no responsibility for the design or construction of the plant involved. The study shall also include an analysis of quality assurance and quality control programs at representative sites at which such programs are operating satisfactorily and an assessment of the reasons therefor.

“(c) For purposes of—

“(1) determining the best means of assuring that commercial nuclear powerplants are constructed in accordance with the applicable safety requirements in effect pursuant to the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.]; and

“(2) assessing the feasibility and benefits of the various means listed in subsection (b);

the Commission shall undertake a pilot program to review and evaluate programs that include one or more of the alternative concepts identified in subsection (b) for the purposes of assessing the feasibility and benefits of their implementation. The pilot program shall include programs that use independent inspectors for auditing quality assurance responsibilities of the licensee for the construction of commercial nuclear powerplants, as described in paragraph (5) of subsection (b). The pilot program shall include at least three sites at which commercial nuclear powerplants are under construction. The Commission shall select at least one site at which quality assurance and quality control programs have operated satisfactorily, and at least two sites with remedial programs underway at which major construction, quality assurance, or quality control deficiencies (or any combination thereof) have been identified in the past. The Commission may require any changes in existing quality assurance and quality control organizations and relationships that may be necessary at the selected sites to implement the pilot program.

“(d) Not later than fifteen months after the date of the enactment of this Act [Jan. 4, 1983], the Commission shall complete the study required under subsection (b) and submit to the United States Senate and House of Representatives a report setting forth the results of the study. The report shall include a brief summary of the information received from the public and from other persons referred to in subsection (b) and a statement of the Commission's response to the significant comments received. The report shall also set forth an analysis of the results of the pilot program required under subsection (c). The report shall be accompanied by the recommendations of the Commission, including any legislative recommendations, and a description of any administrative actions that the Commission has undertaken or intends to undertake, for improving quality assurance and quality control programs that

are applicable during the construction of nuclear powerplants.”

TRANSPORTATION OF NUCLEAR WASTE WITH POTENTIAL FOR SIGNIFICANT PUBLIC HEALTH AND SAFETY HAZARDS; REGULATIONS FOR NOTICE TO GOVERNOR

Pub. L. 96-295, title III, §301, June 30, 1980, 94 Stat. 789, directed Nuclear Regulatory Commission, within 90 days of June 30, 1980, to promulgate regulations providing for timely notification to the Governor of any State prior to the transport of nuclear waste, including spent nuclear fuel, to, through, or across the boundaries of such State, and provided that such notification requirement would not apply to nuclear waste in such quantities and of such types as the Commission specifically determined did not pose a potentially significant hazard to the health and safety of the public.

REVIEW OF SELECTION AND TRAINING OF MEMBERS OF ATOMIC SAFETY AND LICENSING BOARDS; REPORT TO CONGRESS

Pub. L. 95-601, §7, Nov. 6, 1978, 92 Stat. 2950, directed Commission to undertake a comprehensive review of the existing process for selection and training of members of the Atomic Safety and Licensing Boards, report to Congress on findings of such review by Jan. 1, 1979, and revise such selection and training process as appropriate, based on such findings.

PLUTONIUM SHIPMENTS RESTRICTIONS

Section 201 of Pub. L. 94-79 provided in part that: “The Nuclear Regulatory Commission shall not license any shipments by air transport of plutonium in any form, whether exports, imports or domestic shipments: *Provided, however,* That any plutonium in any form contained in a medical device designed for individual human application is not subject to this restriction. This restriction shall be in force until the Nuclear Regulatory Commission has certified to the Joint Committee on Atomic Energy of the Congress that a safe container has been developed and tested which will not rupture under crash and blast-testing equivalent to the crash and explosion of a high-flying aircraft.”

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I am submitting herewith to the Congress Reorganization Plan No. 1 of 1980, under authority vested in me by the Reorganization Act of 1977 (Chapter 9 of Title 5 of the United States Code). The Plan is designed to strengthen management of the Nuclear Regulatory Commission in order to foster safety in all of the agency's activities.

The need for more effective management of the Nuclear Regulatory Commission has been amply demonstrated over the past year. The accident at Three Mile Island one year ago revealed serious shortcomings in the agency's ability to respond effectively during a crisis. The lessons learned from that accident go beyond crisis management, however. They provide the impetus for improving the effectiveness of all aspects of the government regulation of nuclear energy.

In my statement of December 7, 1979, I responded to the recommendations of my Commission on the Accident at Three Mile Island and set forth steps now being taken to address those recommendations. I stated that I would send to Congress a Reorganization Plan to strengthen the Nuclear Regulatory Commission's ability to regulate nuclear safety. I am submitting that Plan today.

The Plan clarifies the duties of the Chairman as principal executive officer. In addition to directing the day-to-day operations of the agency, the Chairman would take charge of the Commission's response to nuclear emergencies and, as principal executive officer, would be guided by Commission policy and subject to Commission oversight.

MANAGEMENT PROBLEMS

Intensive investigations undertaken since the Three Mile Island accident have revealed management problems at the Nuclear Regulatory Commission. These problems must be rectified if the Commission is to be a strong and effective safety regulator.

—My Commission, called the Kemeny Commission after its Chairman, Dr. John Kemeny, concluded that the underlying problem at Three Mile Island stemmed not from deficient equipment but rather from compounded human failures. This included the inability of the Nuclear Regulatory Commission to pursue its safety mission effectively in view of its existing management policies and practices. The Kemeny Commission reported a lack of "closure" in the system to ensure that safety issues are raised, analyzed and resolved. Kemeny Commission members also concluded that the Nuclear Regulatory Commission relies too heavily on licensing, and pays insufficient attention to ensuring the safety of plants once they are in operation.

—During the course of its investigation, the Kemeny Commission found serious managerial problems at the top of the Nuclear Regulatory Commission. It noted that the Commissioners and the Chairman are unclear as to their respective roles. Uncertain, diffuse leadership of this kind leads to highly compartmentalized offices that operate with little or no effective guidance and little coordination.

—A recently completed independent study authorized and funded by the Nuclear Regulatory Commission

itself also found serious fault with the Commission's management and called for a major organizational overhaul. The report states that there is no authoritative manager but, instead, five equally responsible Commissioners who deal individually with office directors who, in turn, head their own "independent fiefdoms."

—Likewise, a recent report of the General Accounting Office notes the failure of the Nuclear Regulatory Commission to define either the authority of the Chairman or that of the Executive Director for Operations. The staff lacks policy guidance and top management leadership to set priorities and resolve safety issues. There are unreasonable delays in developing policies to guide the licensing and enforcement activities of the agency.

The central theme in all three of these studies is the failure of the Nuclear Regulatory Commission to provide unified leadership and consistent direction of the agency's activities. The present statutes contain conflicting and ambiguous provisions for managing the agency. Important corrective actions cannot or will not be taken by the Commission until the laws are changed. Failure to do so constitutes a continuing nuclear safety hazard.

The present Reorganization Plan would improve the effectiveness of the Nuclear Regulatory Commission by giving the Chairman the powers he needs to ensure efficient and coherent management in a manner that preserves, in fact enhances, the commission form of organization.

COMMISSION

Under the proposed Plan, the Commission would continue to be responsible for policy formulation, rule-making and adjudication as functions which should have collegial deliberation. In addition, the Commission would review and approve proposals by the Chairman concerning key management actions such as personnel decisions affecting top positions which directly support Commission functions, the annual budget, and major staff reorganizations. In carrying out its role, the Commission would have the direct assistance of several Commission-level offices as well as the licensing board, the appeal panel, and the Advisory Committee on Reactor Safeguards. The Plan would not alter the present arrangement whereby the Commission, acting on majority vote, represents the ultimate authority of the Nuclear Regulatory Commission and sets the framework within which the Chairman is to operate.

CHAIRMAN

Under the Plan, the Chairman would act as the principal executive officer and spokesman for the Commission. To accomplish this, those functions of the Nuclear Regulatory Commission not retained by the Commission would be vested in the Chairman, who is currently coequal with the Commissioners in all decisions and actions. The Chairman would be authorized to make appointments, on his own authority, to all positions not specified for Commission approval and would be responsible to the Commission for assuring staff support by the operating offices in meeting the needs of the Commission. The Executive Director for Operations would report directly to and receive his authority from the Chairman. Heads of operating offices would also report to the Chairman or, by delegation, to the Executive Director for Operations. Office heads would also be authorized to communicate directly with members of the Commission whenever an office head believed critical safety issues were not being addressed.

EMERGENCY MANAGEMENT

The Nuclear Regulatory Commission's ability to respond decisively and responsibly to any nuclear emergency must be fully ensured in advance. Experience has shown that the Commission as a whole cannot deal expeditiously with emergencies or communicate in a clear, unified voice to civil authorities or to the public.

But present law prevents the Commission from delegating its emergency authority to one of its members. The Plan would correct this situation by specifically authorizing the Chairman to act for the Commission in an emergency. In order to ensure flexibility, the Chairman would be permitted to delegate his authority to deal with a particular emergency to any other Commissioner. Plans for dealing with various contingencies would be approved by the Commission in advance. The Commission would also receive a report from the Chairman or his designee describing the management of the emergency once it was over.

ACTIONS NOT INCLUDED IN THIS PLAN

Not included in this Plan are two actions that I support in principle but that need not or cannot be accomplished by means of a Reorganization Plan. First the Commission, as part of its implementation of this reorganization, can and should establish an internal entity to help oversee the performance of the agency as it operates under the Chairman's direction. This action does not require a Reorganization Plan. Second, I have consistently favored funding assistance to intervenors in regulatory proceedings. This is particularly important in the case of nuclear safety regulation. I therefore encourage the Commission to include consideration of intervenor funding as part of its review and upgrading of the licensing process, as called for by the Kemeny Commission. I have also requested Congress to appropriate funds for this purpose. This activity cannot be authorized by a Reorganization Plan.

NO ADDED COSTS

This proposed realignment and clarification of responsibilities would not result in an increase or decrease of expenditures. But placing management responsibilities in the Chairman would result in greater attention to developing and implementing nuclear safety policies and to strict enforcement of the terms of licenses granted by the Commission.

Each of the provisions of this proposed reorganization would also accomplish one or more of the purposes set forth in 5 U.S.C. 901(a). No statutory functions would be abolished by the Plan; rather they would be consolidated or reassigned in order to improve management, delivery of services, execution of the law, and overall operational efficiency and effectiveness of the Commission.

By Executive Order No. 12202, dated March 18, 1980 [42 U.S.C. 5848 note], I established a Nuclear Safety Oversight Committee to advise me of progress being made by the Nuclear Regulatory Commission, the nuclear industry, and others in improving nuclear safety. I am confident that the present Reorganization Plan, together with the other steps that have been or are being taken by this Administration and by others, will greatly advance the goal of nuclear safety. It would permit the Commission and the American people to hold one individual—the Chairman—accountable for implementation of the Commission's policies through effective management of the Commission staff. Freed of management and administrative details, the Commission could then concentrate on the purpose for which that collegial body was created—to deliberate on the formulation of policy and rules to govern nuclear safety and to decide or oversee disposition of individual cases.

JIMMY CARTER.

THE WHITE HOUSE, March 27, 1980.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I herewith transmit the following amendments to Reorganization Plan No. 1 of 1980, which I sent to the Congress on March 27, 1980.

The amendments to Reorganization Plan No. 1 are consistent with my original intent of strengthening the management of the Nuclear Regulatory Commission in order to improve safety in all of the agency's activities, while preserving the advantages of the Commission

form. The amendments reinforce the purpose of the Plan in two respects. First, the amended Plan gives the Commission a greater role in selection of key program officers of the agency by adding four positions to the list of appointments initiated by the Chairman for the Commission's advice and consent. These are the Executive Director for Operations, the Director of Inspection and Enforcement, the Director of Nuclear Regulatory Research, and the Director of Standards Development. Each of these positions contributes to nuclear safety regulation, and each performs functions that help determine the policy and performance of the agency.

The Advisory Committee on Reactor Safeguards advises the Commission as a whole. Since its members serve renewable 4-year terms, another amendment provides that a Commission member, as well as the Chairman, can initiate an appointment to the Advisory Committee on Reactor Safeguards for approval by the Commission.

As a means to ensure that the flow of information to the Commission will not be restricted, the Plan has been amended to make explicit that the Chairman, and the Executive Director of Operations through the Chairman, shall keep the Commission fully and currently informed.

The second general purpose of the amendments is to provide for more effective management of the agency by making more explicit the responsibilities of the Chairman and the Executive Director for Operations acting under his direction. As amended, the Plan charges the Chairman with planning for the development of policy for consideration and approval by the Commission. In the past, this responsibility has not been clearly fixed and has consequently been neglected. The amended Plan continues to make clear that the Executive Director for Operations reports to the Chairman. An amendment, however, requires the Chairman to delegate to the Executive Director for Operations the authority to appoint the staff and the day-to-day administration of the agency. Under this arrangement, the Chairman retains responsibility for the delegated functions but will be better able to handle his other leadership tasks.

In summary, the amendments I am transmitting to Reorganization Plan No. 1 of 1980, based on review and hearings conducted by the Congress and on continued consultations, will help establish a more accountable central management structure for the Nuclear Regulatory Commission as it pursues its statutory objective of ensuring safety in the use of nuclear power.

JIMMY CARTER.

THE WHITE HOUSE, May 5, 1980.

EXECUTIVE ORDER No. 11902

(B) If, in response to a complaint filed under paragraph (1), the Secretary determines that a violation of subsection (a) of this section has occurred, the Secretary shall order the person who committed such violation to (i) take affirmative action to abate the violation, and (ii) reinstate the complainant to his former position together with the compensation (including back pay), terms, conditions, and privileges of his employment, and the Secretary may order such person

to provide compensatory damages to the complainant. If an order is issued under this paragraph, the Secretary, at the request of the complainant shall assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorneys' and expert witness fees) reasonably incurred, as determined by the Secretary, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

(3)(A) The Secretary shall dismiss a complaint filed under paragraph (1), and shall not conduct the investigation required under paragraph (2), unless the complainant has made a prima facie showing that any behavior described in subparagraphs (A) through (F) of subsection (a)(1) of this section was a contributing factor in the unfavorable personnel action alleged in the complaint.

(B) Notwithstanding a finding by the Secretary that the complainant has made the showing required by subparagraph (A), no investigation required under paragraph (2) shall be conducted if the employer demonstrates, by clear and convincing evidence, that it would have taken the same unfavorable personnel action in the absence of such behavior.

(C) The Secretary may determine that a violation of subsection (a) of this section has occurred only if the complainant has demonstrated that any behavior described in subparagraphs (A) through (F) of subsection (a)(1) of this section was a contributing factor in the unfavorable personnel action alleged in the complaint.

(D) Relief may not be ordered under paragraph (2) if the employer demonstrates by clear and convincing evidence that it would have taken the same unfavorable personnel action in the absence of such behavior.

(4) If the Secretary has not issued a final decision within 1 year after the filing of a complaint under paragraph (1), and there is no showing that such delay is due to the bad faith of the person seeking relief under this paragraph, such person may bring an action at law or equity for de novo review in the appropriate district court of the United States, which shall have jurisdiction over such an action without regard to the amount in controversy.

(c) Review

(1) Any person adversely affected or aggrieved by an order issued under subsection (b) of this section may obtain review of the order in the United States court of appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred. The petition for review must be filed within sixty days from the issuance of the Secretary's order. Review shall conform to chapter 7 of title 5. The commencement of proceedings under this subparagraph shall not, unless ordered by the court, operate as a stay of the Secretary's order.

(2) An order of the Secretary with respect to which review could have been obtained under paragraph (1) shall not be subject to judicial review in any criminal or other civil proceeding.

(d) Jurisdiction

Whenever a person has failed to comply with an order issued under subsection (b)(2) of this

section, the Secretary may file a civil action in the United States district court for the district in which the violation was found to occur to enforce such order. In actions brought under this subsection, the district courts shall have jurisdiction to grant all appropriate relief including, but not limited to, injunctive relief, compensatory, and exemplary damages.

(e) Commencement of action

(1) Any person on whose behalf an order was issued under paragraph (2) of subsection (b) of this section may commence a civil action against the person to whom such order was issued to require compliance with such order. The appropriate United States district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce such order.

(2) The court, in issuing any final order under this subsection, may award costs of litigation (including reasonable attorney and expert witness fees) to any party whenever the court determines such award is appropriate.

(f) Enforcement

Any nondiscretionary duty imposed by this section shall be enforceable in a mandamus proceeding brought under section 1361 of title 28.

(g) Deliberate violations

Subsection (a) of this section shall not apply with respect to any employee who, acting without direction from his or her employer (or the employer's agent), deliberately causes a violation of any requirement of this chapter or of the Atomic Energy Act of 1954, as amended [42 U.S.C. 2011 et seq.].

(h) Nonpreemption

This section may not be construed to expand, diminish, or otherwise affect any right otherwise available to an employee under Federal or State law to redress the employee's discharge or other discriminatory action taken by the employer against the employee.

(i) Posting requirement

The provisions of this section shall be prominently posted in any place of employment to which this section applies.

(j) Investigation of allegations

(1) The Commission or the Department of Energy shall not delay taking appropriate action with respect to an allegation of a substantial safety hazard on the basis of—

(A) the filing of a complaint under subsection (b)(1) of this section arising from such allegation; or

(B) any investigation by the Secretary, or other action, under this section in response to such complaint.

(2) A determination by the Secretary under this section that a violation of subsection (a) of this section has not occurred shall not be considered by the Commission or the Department of Energy in its determination of whether a substantial safety hazard exists.

§ 5871. Transitional provisions**(a) Lapse of agency or other body from which functions or programs have been transferred and positions or offices therein**

Except as otherwise provided in this chapter, whenever all of the functions or programs of an agency, or other body, or any component thereof, affected by this chapter, have been transferred from that agency, or other body, or any component thereof by this chapter, the agency,

or other body, or component thereof shall lapse. If an agency, or other body, or any component thereof, lapses pursuant to the preceding sentence, each position and office therein which was expressly authorized by law, or the incumbent of which was authorized to receive compensation at the rate prescribed for an office or position at level II, III, IV, or V of the Executive Schedule (5 U.S.C. 5313-5316), shall lapse.

(b) Continuation of orders, determinations, rules, etc.

All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, any Federal department or agency or official thereof, or by a court of competent jurisdiction, in the performance of functions which are transferred under this chapter, and

(2) which are in effect at the time this chapter takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Administrator, the Commission, or other authorized officials, a court of competent jurisdiction, or by operation of law.

(c) Effect of chapter on proceedings pending before Atomic Energy Commission or other department or agency

The provisions of this chapter shall not affect any proceeding pending, at the time this section takes effect, before the Atomic Energy Commission or any department or agency (or component thereof) functions of which are transferred by this chapter; but such proceedings, to the extent that they relate to functions so transferred, shall be continued. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this chapter had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this subsection shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued if this chapter had not been enacted.

(d) Effect of chapter on suits commenced prior to effective date

Except as provided in subsection (f) of this section—

(1) the provisions of this chapter shall not affect suits commenced prior to the date this chapter takes effect, and

(2) in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this chapter had not been enacted.

(e) Abatement of suits, actions, or other proceedings by or against officer, department, or agency

No suit, action, or other proceeding commenced by or against any officer in his official

capacity as an officer of any department or agency, functions of which are transferred by this chapter, shall abate by reason of the enactment of this chapter. No cause of action by or against any department or agency, functions of which are transferred by this chapter, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this chapter. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or such official as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter any order which will give effect to the provisions of this section.

(f) Continuation of suits; substitution of parties

If, before the date on which this chapter takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this chapter any function of such department, agency, or officer is transferred to the Administrator or Commission, or any other official, then such suit shall be continued as if this chapter had not been enacted, with the Administrator or Commission, or other official, as the case may be, substituted.

(g) Judicial review of orders and actions in performance of transferred functions; statutory requirements relating to notices, hearings, action upon record, or administrative review

Final orders and actions of any official or component in the performance of functions transferred by this chapter shall be subject to judicial review to the same extent and in the same manner as if such orders or actions had been made or taken by the officer, department, agency, or instrumentality in the performance of such functions immediately preceding the effective date of this chapter. Any statutory requirements relating to notices, hearings, action upon the record, or administrative review that apply to any function transferred by this chapter shall apply to the performance of those functions by the Administrator or Commission, or any officer or component.

(h) References in other laws to department, agency, officer, or office whose functions have been transferred deemed reference to Administration, Administrator, or Commission

With respect to any functions transferred by this chapter and performed after the effective date of this chapter, reference in any other law to any department or agency, or any officer or office, the functions of which are so transferred, shall be deemed to refer to the Administration, the Administrator or Commission, or other office or official in which this chapter vests such functions.

(i) Limitation, curtailment, etc., of presidential functions or authority

Nothing contained in this chapter shall be construed to limit, curtail, abolish, or terminate any function of the President which he had immediately before the effective date of this chapter; or to limit, curtail, abolish, or terminate his authority to perform such function; or to

limit, curtail, abolish, or terminate his authority to delegate, redelegate, or terminate any delegation of functions.

(j) References in chapter to provision of law deemed to include references thereto as amended or supplemented

Any reference in this chapter to any provision of law shall be deemed to include, as appropriate, references thereto as now or hereafter amended or supplemented.

(k) Functions conferred by chapter deemed in addition to and not substitution for functions existing before effective date

Except as may be otherwise expressly provided in this chapter, all functions expressly conferred by this chapter shall be in addition to and not in substitution for functions existing immediately before the effective date of this chapter and transferred by this chapter.

§ 5901. Congressional statement of findings

The Congress hereby finds that—

(a) The Nation is suffering from a shortage of environmentally acceptable forms of energy.

(b) Compounding this energy shortage is our past and present failure to formulate a comprehensive and aggressive research and development program designed to make available to American consumers our large domestic energy reserves including fossil fuels, nuclear fuels, geothermal resources, solar energy, and other forms of energy. This failure is partially because the unconventional energy technologies have not been judged to be economically competitive with traditional energy technologies.

(c) The urgency of the Nation's energy challenge will require commitments similar to those undertaken in the Manhattan and Apollo projects; it will require that the Nation undertake a research, development, and demonstration program in nonnuclear energy technologies with a total Federal investment which may reach or exceed \$20,000,000,000 over the next decade.

(d) In undertaking such program, full advantage must be taken of the existing technical and managerial expertise in the various energy fields within Federal agencies and particularly in the private sector.

(e) The Nation's future energy needs can be met if a national commitment is made now to dedicate the necessary financial resources, to enlist our scientific and technological capabilities, and to accord the proper priority to developing new nonnuclear energy options to serve national needs, conserve vital resources, and protect the environment.

(Pub. L. 93-577, §2, Dec. 31, 1974, 88 Stat. 1879.)

§ 5904. Research, development, and demonstration program governing principles

(a) The Congress authorizes and directs that the comprehensive program in research, development, and demonstration required by this chapter shall be designed and executed according to the following principles:

(1) Energy conservation shall be a primary consideration in the design and implementation of the Federal nonnuclear energy program. For the purposes of this chapter, energy conservation means both improvement in efficiency of energy production and use, and reduction in energy waste.

(2) The environmental and social consequences of a proposed program shall be analyzed and considered in evaluating its potential.

(3) Any program for the development of a technology which may require significant consumptive use of water after the technology has reached the stage of commercial application shall include thorough consideration of the impacts of such technology and use on water resources pursuant to the provisions of section 5912 of this title.

(4) Heavy emphasis shall be given to those technologies which utilize renewable or essentially inexhaustible energy sources.

(5) The potential for production of net energy by the proposed technology at the stage of commercial application shall be analyzed and considered in evaluating proposals.

(b) The Congress further directs that the execution of the comprehensive research, development, and demonstration program shall conform to the following principles:

(1) Research and development of nonnuclear energy sources shall be pursued in such a way as to facilitate the commercial availability of adequate supplies of energy to all regions of the United States.

(2) In determining the appropriateness of Federal involvement in any particular research and development undertaking, the Secretary shall give consideration to the extent to which the proposed undertaking satisfies criteria including, but not limited to, the following:

(A) The urgency of public need for the potential results of the research, development, or demonstration effort is high, and it is unlikely that similar results would be achieved in a timely manner in the absence of Federal assistance.

(B) The potential opportunities for non-Federal interests to recapture the investment in the undertaking through the normal commercial utilization of proprietary knowledge appear inadequate to encourage timely results.

(C) The extent of the problems treated and the objectives sought by the undertaking are national or widespread in their significance.

(D) There are limited opportunities to induce non-Federal support of the undertaking through regulatory actions, end use controls, tax and price incentives, public education, or other alternatives to direct Federal financial assistance.

(E) The degree of risk of loss of investment inherent in the research is high, and the availability or risk capital to the non-Federal entities which might otherwise engage in the field of the research is inadequate for the timely development of the technology.

(F) The magnitude of the investment appears to exceed the financial capabilities of potential non-Federal participants in the research to support effective efforts.

§ 5906. Federal assistance and participation in programs

(a) Forms of activities authorized

In carrying out the objectives of this chapter, the Secretary may utilize various forms of Federal assistance and participation which may include but are not limited to—

- (1) joint Federal-industry experimental, demonstration, or commercial corporations

consistent with the provisions of subsection (b) of this section;

(2) contractual arrangements with non-Federal participants including corporations, consortia, universities, governmental entities and nonprofit institutions;

(3) contracts for the construction and operation of federally owned facilities;

(4) Federal purchases or guaranteed price of the products of demonstration plants or activities consistent with the provisions of subsection (c) of this section;

(5) Federal loans to non-Federal entities conducting demonstrations of new technologies;

(6) incentives, including financial awards, to individual inventors, such incentives to be designed to encourage the participation of a large number of such inventors; and

(7) Federal loan guarantees and commitments thereof as provided in section 5919¹ of this title.

(b) Proposed joint Federal-industry corporations; operational guidelines; powers, duties, and functions; composition; scope of Federal assistance and participation; specific authorization

Joint Federal-industry corporations proposed for congressional authorization pursuant to this chapter shall be subject to the provisions of section 5908 of this title and shall conform to the following guidelines except as otherwise authorized by Congress:

(1) Each such corporation may design, construct, operate, and maintain one or more experimental, demonstration, or commercial-size facilities, or other operations which will ascertain the technical, environmental, and economic feasibility of a particular energy technology. In carrying out this function, the corporation shall be empowered, either directly or by contract, to utilize commercially available technologies, perform tests, or design, construct, and operate pilot plants, as may be necessary for the design of the full-scale facility.

(2) Each corporation shall have—

(A) a Board of nine directors consisting of individuals who are citizens of the United States, of whom one shall be elected annually by the Board to serve as Chairman. The Board shall be empowered to adopt and amend bylaws. Five members of the Board shall be appointed by the President of the United States, by and with the advice and consent of the Senate, and four members of the Board shall be appointed by the President on the basis of recommendations received by him from any non-Federal entity or entities entering into contractual arrangements to participate in the corporation;

(B) a President and such other officers and employees as may be named and appointed by the Board (with the rates of compensation of all officers and employees being fixed by the Board); and

(C) the usual powers conferred upon corporations by the laws of the District of Columbia.

¹ See Codification note below.

(3) An appropriate time interval, not to exceed 12 years, shall be established for the term of Federal participation in the corporation, at the expiration of which the Board of Directors shall take such action as may be necessary to dissolve the corporation or otherwise terminate Federal participation and financial interests. In carrying out such dissolution, the Board of Directors shall dispose of all physical facilities of the corporation in such manner and subject to such terms and conditions as the Board determines are in the public interest and consistent with existing law; and a share of the appraised value of the corporate assets proportional to the Federal participation in the corporation, including the proceeds from the disposition of such facilities, on the date of its dissolution, after satisfaction of all its legal obligations, shall be made available to the United States and deposited in the Treasury of the United States as miscellaneous receipts. All patent rights of the corporation shall, on such date of dissolution, be vested in the Secretary: *Provided*, That Federal participation may be terminated prior to the time established in the authorizing Act upon recommendation of the Board of Directors.

(4) Any commercially valuable product produced by demonstration facilities shall be disposed of in such manner and under such terms and conditions as the corporation shall prescribe. All revenues received by the corporation from the sale of such products shall be available to the corporation for use by it in defraying expenses incurred in connection with carrying out its functions to which this chapter applies.

(5) The estimated Federal share of the construction, operation, and maintenance cost over the life of each corporation shall be determined in order to facilitate a single congressional authorization of the full amount at the time of establishment of the corporation.

(6) The Federal share of the cost of each such corporation shall reflect (A) the technical and economic risk of the venture, (B) the probability of any financial return to the non-Federal participants arising from the venture, (C) the financial capability of the potential non-Federal participants, and (D) such other factors as the Secretary may set forth in proposing the corporation: *Provided*, That in no instance shall the Federal share exceed 90 per centum of the cost.

(7) No such corporation shall be established unless previously authorized by specific legislation enacted by the Congress.

(c) Proposed competitive systems of price supports for demonstration facilities; guidelines

Competitive systems of price supports proposed for congressional authorization pursuant to this chapter shall conform to the following guidelines:

(1) The Secretary shall determine the types and capacities of the desired full-scale, commercial-size facility or other operation which would demonstrate the technical, environmental, and economic feasibility of a particular nonnuclear energy technology.

(2) The Secretary may award planning grants for the purpose of financing a study of

the full cycle economic and environmental costs associated with the demonstration facility selected pursuant to paragraph (1) of this subsection. Such planning grants may be awarded to Federal and non-Federal entities including, but not limited to, industrial entities, universities, and nonprofit organizations. Such planning grants may also be used by the grantee to prepare a detailed and comprehensive bid to construct the demonstration facility.

(3) Following the completion of the studies pursuant to the planning grants awarded under paragraph (2) of this subsection regarding each such potential price supported demonstration facility for which the Secretary intends to request congressional authorization, he shall invite bids from all interested parties to determine the minimum amount of Federal price support needed to construct the demonstration facility. The Secretary may designate one or more competing entities, each to construct one commercial demonstration facility. Such designation shall be made on the basis of those entities, (A) commitment to construct the demonstration facility at the minimum level of Federal price supports, (B) detailed plan of environmental protection, and (C) proposed design and operation of the demonstration facility.

(4) The construction plans and actual construction of the demonstration facility, together with all related facilities, shall be monitored by the Environmental Protection Agency. If additional environmental requirements are imposed by the Secretary after the designation of the successful bidders and if such additional environmental requirements result in additional costs, the Secretary is authorized to renegotiate the support price to cover such additional costs.

(5) The estimated amount of the Federal price support for a demonstration facility's product over the life of such facility shall be determined by the Secretary to facilitate a single congressional authorization of the full amount of such support at the time of the designation of the successful bidders.

(6) No price support program shall be implemented unless previously authorized by specific legislation enacted by the Congress.

(d) Support for joint university-industry research efforts

Nothing in this section shall preclude Federal participation in, and support for, joint university-industry nonnuclear energy research efforts.

¹ So in original. Probably should be a comma.

- (3) the extent to which the contractor's commercial position may expedite utilization of the research, development, and demonstration program results;
- (4) the extent to which the Government has contributed to the field of technology to be funded under the contract;

(10) the likely effect of the waiver on competition and market concentration; and

(11) in the case of a nonprofit educational institution, the extent to which such institution has a technology transfer capability and program, approved by the Secretary as being consistent with the applicable policies of this section.

(e) Considerations applicable to identified invention for waiver determination by Secretary

In determining whether a waiver to the contractor or inventor or rights to an identified invention will best serve the interests of the United States and the general public, the Secretary shall specifically include as considerations paragraphs (4) through (11) of subsection (d) of this section as applied to the invention and—

- (1) the extent to which such waiver is a reasonable and necessary incentive to call forth private risk capital for the development and commercialization of the invention; and
- (2) the extent to which the plans, intentions, and ability of the contractor or inventor will obtain expeditious commercialization of such invention.

(f) Rights subject to reservation where title to invention vested in United States

Whenever title to an invention is vested in the United States, there may be reserved to the contractor or inventor—

- (1) a revocable or irrevocable nonexclusive, paid-up license for the practice of the invention throughout the world; and

§ 6104. Enforcement

(a) Methods of achieving compliance with regulations

The head of any Federal department or agency who prescribes regulations under section 6103 of this title may seek to achieve compliance with any such regulation—

(1) by terminating, or refusing to grant or to continue, assistance under the program or activity involved to any recipient with respect to whom there has been an express finding on the record, after reasonable notice and opportunity for hearing, of a failure to comply with any such regulation; or

(2) by any other means authorized by law.

(b) Limitations on termination of, or on refusal to grant or to continue, assistance; disbursement of withheld funds to achiever agencies

Any termination of, or refusal to grant or to continue, assistance under subsection (a)(1) of this section shall be limited to the particular

political entity or other recipient with respect to which a finding has been made under subsection (a)(1) of this section. Any such termination or refusal shall be limited in its effect to the particular program or activity, or part of such program or activity, with respect to which such finding has been made. No such termination or refusal shall be based in whole or in part on any finding with respect to any program or activity which does not receive Federal financial assistance. Whenever the head of any Federal department or agency who prescribes regulations under section 6103 of this title withholds funds pursuant to subsection (a) of this section, he may, in accordance with regulations he shall prescribe, disburse the funds so withheld directly to any public or nonprofit private organization or agency, or State or political subdivision thereof, which demonstrates the ability to achieve the goals of the Federal statute authorizing the program or activity while complying with regulations issued under section 6103 of this title.

(c) Advice as to failure to comply with regulation; determination that compliance cannot be secured by voluntary means

No action may be taken under subsection (a) of this section until the head of the Federal department or agency involved has advised the appropriate person of the failure to comply with the regulation involved and has determined that compliance cannot be secured by voluntary means.

In the case of any action taken under subsection (a) of this section, the head of the Federal department or agency involved shall transmit a written report of the circumstances and grounds of such action to the committees of the House of Representatives and the Senate having legislative jurisdiction over the program or activity involved. No such action shall take effect until thirty days after the transmission of any such report.

(e) Injunctions; notice of violations; costs; conditions for actions

(1) When any interested person brings an action in any United States district court for the district in which the defendant is found or transacts business to enjoin a violation of this Act by any program or activity receiving Federal financial assistance, such interested person shall give notice by registered mail not less than 30 days prior to the commencement of that action to the Secretary of Health and Human Services, the Attorney General of the United States, and the person against whom the action is directed. Such interested person may elect, by a demand for such relief in his complaint, to recover reasonable attorney's fees, in which case the court shall award the costs of suit, including a reasonable attorney's fee, to the prevailing plaintiff.

(2) The notice referred to in paragraph (1) shall state the nature of the alleged violation, the relief to be requested, the court in which the action will be brought, and whether or not attorney's fees are being demanded in the event that the plaintiff prevails. No action described in paragraph (1) shall be brought (A) if at the time

the action is brought the same alleged violation by the same defendant is the subject of a pending action in any court of the United States; or (B) if administrative remedies have not been exhausted.

(f) Exhaustion of administrative remedies

With respect to actions brought for relief based on an alleged violation of the provisions of this chapter, administrative remedies shall be deemed exhausted upon the expiration of 180 days from the filing of an administrative complaint during which time the Federal department or agency makes no finding with regard to the complaint, or upon the day that the Federal department or agency issues a finding in favor of the recipient of financial assistance, whichever occurs first.

NATIONAL OIL HEAT RESEARCH ALLIANCE

Pub. L. 106-469, title VII, Nov. 9, 2000, 114 Stat. 2043, as amended by Pub. L. 109-58, title III, §302, Aug. 8, 2005, 119 Stat. 685, provided that:

“SEC. 701. SHORT TITLE.

“This title may be cited as the ‘National Oilheat Research Alliance Act of 2000’.

“SEC. 702. FINDINGS.

“Congress finds that—

“(1) oilheat is an important commodity relied on by approximately 30,000,000 Americans as an efficient and economical energy source for commercial and residential space and hot water heating;

“(2) oilheat equipment operates at efficiencies among the highest of any space heating energy source, reducing fuel costs and making oilheat an economical means of space heating;

“(3) the production, distribution, and marketing of oilheat and oilheat equipment plays a significant role in the economy of the United States, accounting for approximately \$12,900,000,000 in expenditures annually and employing millions of Americans in all aspects of the oilheat industry;

“(4) only very limited Federal resources have been made available for oilheat research, development, safety, training, and education efforts, to the detriment of both the oilheat industry and its 30,000,000 consumers; and

“(5) the cooperative development, self-financing, and implementation of a coordinated national oilheat industry program of research and development, training, and consumer education is necessary and important for the welfare of the oilheat industry, the general economy of the United States, and the millions of Americans that rely on oilheat for commercial and residential space and hot water heating.
